MODIFICATIONS OF THE ADMINISTRATIVE INSTRUCTIONS UNDER THE PCT**NOTE PREPARED BY THE INTERNATIONAL BUREAU**

Following the adoption by the Assembly of the International Patent Cooperation Union (PCT Union), at its thirty-fourth (15th ordinary) session, held in Geneva from 26 September to 5 October 2005, of amendments to the Regulations under the PCT which will enter into force on 1 April 2006 (see PCT Gazette No. 08/2006 of 23 February 2006, pages 5486 to 5494), a number of modifications have been made to Sections 209, 211, 212, 213, 215, 404, 406, 407, 408, 410, 422, 433 and to Annexes D and E of the Administrative Instructions under the PCT. In addition to the modification of the existing Sections listed above, new Sections 319, 424 and 435 have been included in the Administrative Instructions under the PCT.

All modified Sections of the Administrative Instructions under the PCT will apply to international applications filed on or after 1 April 2006. However, Sections 209, 404, 406, 407, 408, 410, 422, 433, 435 and Annexes D and E will apply to international applications as from 1 April 2006 irrespective of their international filing date.

The modifications involve:

(i) clarifications and simplifications which are not consequential to amendments of the Regulations with effect from 1 April 2006 (Sections 209 and 433):

– Section 209 is modified in order to avoid having to refer to specific designated Offices whose applicable national law requires that indications relating to deposited biological material be included in the description; the relevant information is available in the *PCT Applicant's Guide*, Annex L;

– the title of Section 433 is modified since PCT Rule 90.5(c) does not provide for the International Bureau to make a waiver;

(ii) the amendment to PCT Rule 48.2(a)(x) which was designed to avoid the operational complexity of having to communicate declarations made under PCT Rule 4.17 to specific designated Offices chosen by the applicant; by including the declarations in the published international application, all Offices will automatically receive them as part of the published international application; the requirement for the applicant to indicate the designated Offices for which any of the possible declarations is made has been deleted (Sections 211, 212, 213, 215 and Annex D);

(iii) guidance to receiving Offices and the International Bureau, respectively, for cases where an applicant made an indication under PCT Rule 4.9(b) but did not claim the priority of an earlier application filed in the State the designation of which is not made (Sections 319 and 424);

(iv) harmonization of the nomenclature of certain Administrative Instructions with that of the PCT Regulations, namely the replacement of the term “pamphlet” by “published international application” wherever appropriate throughout the Administrative Instructions; with reference to Section 406, paragraph (c) has been modified to reflect the current practice of the International Bureau to consult on details of the publication, and of the form and content of the front page (Sections 404, 406, 408, 410 and 422);

(v) the consequences of the amendments to PCT Rules 48 and 86, and in the case of Section 407, the addition of new paragraph (d) to reflect the current practice of the International Bureau to consult on details concerning the form and content of the Gazette (Section 407 and Annex E);

MODIFICATIONS DES INSTRUCTIONS ADMINISTRATIVES DU PCT**NOTE DU BUREAU INTERNATIONAL**

Suite à l'adoption par l'Assemblée de l'Union internationale de coopération en matière de brevets (Union du PCT), lors de sa trente-quatrième session (15^e session ordinaire), qui s'est tenue à Genève du 26 septembre au 5 octobre 2005, de modifications du règlement d'exécution du PCT qui entreront en vigueur le 1^{er} avril 2006 (voir la Gazette du PCT n^o 08/2006 du 23 février 2006, pages 5487 à 5495), un certain nombre de modifications ont été apportées aux instructions 209, 211, 212, 213, 215, 404, 406, 407, 408, 410, 422, 433 et aux annexes D et E des Instructions administratives du PCT. En plus des modifications des instructions existantes mentionnées ci-dessus, les nouvelles instructions 319, 424 et 435 ont été ajoutées aux Instructions administratives du PCT.

La totalité des instructions administratives modifiées s'appliquera aux demandes internationales déposées le 1^{er} avril 2006 ou ultérieurement. Cependant, les instructions 209, 404, 406, 407, 408, 410, 422, 433, 435 et les annexes D et E s'appliqueront à compter du 1^{er} avril 2006 à toutes les demandes internationales, quelle que soit leur date de dépôt international.

Les modifications comportent :

i) des clarifications et des simplifications qui ne sont pas consécutives aux modifications du Règlement d'exécution qui entreront en vigueur le 1^{er} avril 2006 (instructions 209 et 433) :

– l'instruction 209 est modifiée pour éviter de devoir indiquer spécifiquement certains offices désignés dont la législation nationale exige que les références relatives à du matériel biologique déposé soient mentionnées dans la description; les informations pertinentes sont publiées dans l'annexe L du *Guide du déposant du PCT*;

– le titre de l'instruction 433 est modifié puisque la règle 90.5.c) du PCT ne prévoit pas la possibilité pour le Bureau international de procéder à une renonciation;

ii) la modification de la règle 48.2.a)x) du PCT qui était destinée à éviter la complexité opérationnelle qui consiste à devoir communiquer les déclarations faites en vertu de la règle 4.17 du PCT aux offices désignés spécifiquement choisis par le déposant; suite à l'inclusion des déclarations dans la demande internationale publiée, tous les offices recevront automatiquement ces déclarations en tant que partie de la demande internationale publiée; l'exigence selon laquelle le déposant doit indiquer pour quels offices désignés chaque déclaration est faite a été supprimée (instructions 211, 212, 213, 215 et annexe D);

iii) une procédure pour les offices récepteurs et le Bureau international, respectivement, dans les cas où le déposant a donné une indication selon la règle 4.9.b) du PCT sans revendiquer la priorité d'une demande antérieure déposée dans l'État dont la désignation n'est pas faite (instructions 319 et 424);

iv) l'harmonisation de la terminologie de certaines instructions administratives avec celle du Règlement d'exécution du PCT, à savoir, le remplacement, le cas échéant, du mot "brochure" par "demande internationale publiée" dans la totalité des instructions administratives; dans l'instruction 406, l'alinéa c) a été modifié pour refléter la pratique actuelle du Bureau international qui consiste à consulter pour tout détail concernant la publication et la forme ou le contenu de la page de couverture (instructions 404, 406, 408, 410, et 422);

v) les conséquences des modifications des règles 48 et 86 du PCT, et, dans le cas de l'instruction 407, l'adjonction d'un nouvel alinéa d) pour refléter la pratique actuelle du Bureau international qui consiste à consulter pour tout détail concernant la forme et le contenu de la gazette (instruction 407 et annexe E);

MODIFICATIONS OF THE ADMINISTRATIVE INSTRUCTIONS UNDER THE PCT (cont'd)**NOTE PREPARED BY THE INTERNATIONAL BUREAU (cont'd)**

(vi) the specification that publications and documents are communicated to Authorities and Offices under PCT Rules 87.1 and 93*bis*.1, respectively, via the International Bureau's electronic data exchange services (such as Communication on Request and PCT Electronic Data Interchange), provided that, if so agreed between the International Bureau and the Office or Authority concerned, publications and documents may be communicated in other forms and by other means (for example, documents may be communicated on paper) (Section 435).

After consultation with the interested Offices and Authorities pursuant to PCT Rule 89.2(b), the modifications to Sections 209, 211, 212, 213, 215, 404, 406, 407, 408, 410, 422, 433 and to Annexes D and E, as well as the inclusion of new Sections 319, 424 and 435 of the Administrative Instructions under the PCT, as set out on pages 9296 to 9312 are promulgated with effect from 1 April 2006.

TEXT OF THE ADMINISTRATIVE INSTRUCTIONS**Section 209****Indications as to Deposited Biological Material on a Separate Sheet**

(a) To the extent that any indication with respect to deposited biological material is not contained in the description, it may be given on a separate sheet. Where any such indication is so given, it shall preferably be on Form PCT/RO/134 and, if furnished at the time of filing, the said Form shall, subject to paragraph (b), preferably be attached to the request and referred to in the check list referred to in Rule 3.3(a)(ii).

(b) For the purposes of designated Offices which have so notified the International Bureau under Rule 13*bis*.7(a), paragraph (a) applies only if the said Form or sheet is included as one of the sheets of the description of the international application at the time of filing.

Section 211**Declaration as to the Identity of the Inventor**

(a) Any declaration as to the identity of the inventor, referred to in Rule 4.17(i), shall be worded as follows:

in relation to [this] international application [No. PCT/...],

... (*name*) of ... (*address*) is the inventor of the subject matter for which protection is sought by way of [the] [this] international application”

(b) This declaration need not be made if the name and address of the inventor are otherwise indicated in the request.

(c) This declaration may, where applicable, be combined, in accordance with Section 212(b), with the declaration referred to in Section 212(a).

MODIFICATIONS DES INSTRUCTIONS ADMINISTRATIVES DU PCT (suite)**NOTE DU BUREAU INTERNATIONAL (suite)**

vi) la précision selon laquelle les publications et les documents sont communiqués aux administrations et aux offices selon les règles 87.1 et 93*bis*.1 du PCT, respectivement, au moyen des services électroniques d'échange de données du Bureau international (tels que la Communication sur demande et le système d'échange électronique de données), étant entendu que si un accord à cet effet est intervenu entre le Bureau international et l'office ou l'administration considéré, les publications et les documents peuvent être communiqués sous d'autres formes ou par d'autres moyens (par exemple, sur papier en ce qui concerne les documents) (instruction 435).

Après consultation des offices et administrations intéressés conformément à la règle 89.2.b) du PCT, les modifications des instructions 209, 211, 212, 213, 215, 404, 406, 407, 408, 410, 422, 433 et des annexes D et E, ainsi que l'inclusion des nouvelles instructions 319, 424 et 435 des Instructions administratives du PCT, figurant aux pages 9297 à 9313, sont promulguées avec effet à partir du 1^{er} avril 2006.

**MEETINGS OF THE INTERNATIONAL PATENT COOPERATION UNION – ASSEMBLY
(THIRTY-FIFTH (20TH EXTRAORDINARY) SESSION)****NOTE PREPARED BY THE INTERNATIONAL BUREAU**

A number of changes to the PCT Regulations and other changes affecting the PCT system were approved by the Assembly of the International Patent Cooperation Union (PCT Union) during its thirty-fifth (20th extraordinary) session, which was held in Geneva from 25 September to 3 October 2006 as part of the meetings of the Assemblies of the Member States of WIPO. Documents which were prepared for the Assembly, and which give detailed background information relating to the decisions that were taken, are available, and the report of the session will be available shortly, on the WIPO website at:

www.wipo.int/meetings/en/details.jsp?meeting_id=11183.

Some of the changes that were approved by the Assembly and which enter into force on 12 October 2006 are outlined below; other changes will be the subject of later publication.

Amendments to the Schedule of Fees annexed to the PCT Regulations

The wording of item 3 of the Schedule of Fees in effect prior to 12 October 2006 implicitly required that, in order to qualify for at least some electronic filing related fee reduction, the request be in character coded format while the description, claims, drawings and abstract might be in a non-character coded format, for example, an image based format such as PDF (portable document format).

Noting that:

(i) some receiving Offices wished to accept international applications filed in electronic form where the entire application, including the request, would be in a non-character coded format, and

(ii) greater efficiency in terms of data entry, optical character recognition, storage, handling and searching possibilities might be achieved where the request is in character coded format,

the Assembly approved the proposal to fix a new reduction in the international filing fee of 100 Swiss francs in respect of international applications where the request was not in character coded format (item 3(b)), compared with 200 Swiss francs where the request was in character coded format (item 3(c)) and 300 Swiss francs where the request, description, claims and abstract were all in character coded format (item 3(d)). The present fee reduction of 100 Swiss francs for filings on paper accompanied by a PCT-SAFE CD or diskette was retained (item 3(a)).

The amended Schedule of Fees enters into force on 12 October 2006, and applies to any international application whose international filing date is on or after 12 October 2006, provided that the Schedule of Fees as worded before its amendment shall continue to apply to any international application which is received by a receiving Office before 12 October 2006, and is accorded an international filing date that is on or after 12 October 2006. The amended Schedule of Fees does not apply to any international application whose international filing date is before 12 October 2006.

The text of the amended Schedule of Fees is reproduced on page 19092.

**RÉUNIONS DE L'UNION INTERNATIONALE DE COOPÉRATION EN MATIÈRE DE BREVETS –
ASSEMBLÉE (TRENTE-CINQUIÈME SESSION (20^e SESSION EXTRAORDINAIRE))****NOTE DU BUREAU INTERNATIONAL**

Un certain nombre de modifications du règlement d'exécution du PCT ainsi que d'autres changements concernant le système du PCT ont été approuvés par l'Assemblée de l'Union internationale de coopération en matière de brevets (Union du PCT) à sa trente-cinquième session (20^e session extraordinaire), qui s'est tenue à Genève du 25 septembre au 3 octobre 2006 dans le cadre des réunions des Assemblées des États membres de l'OMPI. Les documents qui ont été établis pour l'assemblée et qui donnent l'historique des décisions qui ont été prises sont disponibles, et le rapport de la session sera disponible prochainement, sur le site Internet de l'OMPI à l'adresse suivante :

www.wipo.int/meetings/fr/details.jsp?meeting_id=11183.

Certains des changements qui ont été approuvés par l'assemblée et qui entrent en vigueur le 12 octobre 2006 sont présentés ci-dessous; d'autres changements feront l'objet d'une publication ultérieure.

Modifications du barème de taxes annexé au Règlement d'exécution du PCT

Le texte du point 3 du barème de taxes en vigueur avant le 12 octobre 2006 exigeait implicitement que, pour pouvoir bénéficier au moins d'une réduction de taxe, la requête soit présentée en format à codage de caractères alors que la description, les revendications, les dessins et l'abrégé pouvaient ne pas être en format à codage de caractères et être présentés, par exemple, en un format de fichier image tel que PDF (*portable document format*).

Compte tenu :

(i) du fait que certains offices récepteurs souhaitaient accepter des demandes internationales déposées sous forme électronique lorsque la totalité de la demande, y compris la requête, n'était pas en format à codage de caractères, et

(ii) de l'augmentation de l'efficacité en termes de saisie de données, de reconnaissance optique des caractères, de stockage, de traitement et de recherche lorsque la requête est en format à codage de caractères,

l'assemblée a approuvé la proposition de fixer une nouvelle réduction de la taxe internationale de dépôt de 100 francs suisses en ce qui concerne les demandes internationales lorsque la requête n'est pas en format à codage de caractères (point 3.b)) contre 200 francs suisses lorsque la requête est en format à codage de caractères (point 3.c)) et 300 francs suisses lorsque la totalité de la requête, de la description, des revendications et de l'abrégé sont en format à codage de caractères (point 3.d)). La réduction de taxe actuelle de 100 francs suisses pour les dépôts de demandes internationales sur papier, accompagnés d'un CD PCT-SAFE ou d'une disquette, a été conservée (point 3.a)).

Le barème de taxes modifié entre en vigueur le 12 octobre 2006 et s'applique à toute demande internationale dont la date de dépôt international est le 12 octobre 2006 ou une date postérieure, étant entendu que le barème de taxes existant préalablement à la modification continue de s'appliquer à toute demande internationale reçue par un office récepteur avant le 12 octobre 2006 et à laquelle est attribuée comme date de dépôt international le 12 octobre 2006 ou une date postérieure. Le barème de taxes modifié ne s'applique à aucune demande internationale dont la date de dépôt international est antérieure au 12 octobre 2006.

Le texte du barème de taxes modifié est reproduit à la page 19093.

**MEETINGS OF THE INTERNATIONAL PATENT COOPERATION UNION – ASSEMBLY
(THIRTY-FIFTH (20TH EXTRAORDINARY) SESSION) (cont'd)****NOTE PREPARED BY THE INTERNATIONAL BUREAU (cont'd)***Modifications of the Administrative Instructions under the PCT*

Following the adoption by the Assembly of the PCT Union of the proposed amendments to the Schedule of Fees, Section 707 of the Administrative Instructions under the PCT has also been modified. This modification aligns Section 707 with the new wording of item 3 of the Schedule of Fees. Modified Section 707 clarifies that items 3(b), (c) and (d) of the Schedule of Fees apply to reduce the international filing fee in respect of an international application filed in electronic form with a receiving Office which, in accordance with Section 703(d), has decided to receive such an application although it has not formally notified the International Bureau under Section 710(a) that it is prepared to receive international applications in electronic form.

After consultation with the interested Offices and Authorities pursuant to PCT Rule 89.2(b), modified Section 707 is promulgated with effect from 12 October 2006.

The text of modified Section 707 is reproduced on page 19092.

RÉUNIONS DE L'UNION INTERNATIONALE DE COOPÉRATION EN MATIÈRE DE BREVETS – ASSEMBLÉE (TRENTE-CINQUIÈME SESSION (20^e SESSION EXTRAORDINAIRE)) (suite)**NOTE DU BUREAU INTERNATIONAL (suite)***Modifications des Instructions administratives du PCT*

Suite à l'adoption par l'Assemblée de l'Union du PCT des modifications proposées du barème de taxes, l'instruction 707 des Instructions administratives du PCT a également été modifiée. Cette modification aligne l'instruction 707 sur le nouveau texte du point 3 du barème de taxes. L'instruction 707 modifiée précise que les alinéas b), c) et d) du point 3 du barème de taxes sont applicables aux fins de la réduction de la taxe internationale de dépôt en ce qui concerne une demande internationale déposée sous forme électronique auprès d'un office récepteur qui, conformément à l'instruction 703.d), a décidé de recevoir une demande de ce type bien qu'il n'ait pas officiellement informé le Bureau international selon l'instruction 710.a) qu'il est disposé à recevoir des demandes internationales sous forme électronique.

Après consultation des offices et administrations intéressés conformément à la règle 89.2.b) du PCT, l'instruction 707 modifiée est promulguée avec effet à partir du 12 octobre 2006.

Le texte de l'instruction 707 modifié est reproduit à la page 19093.

(1) Following the adoption by the National Assembly of Montenegro of a declaration of independence on 3 June 2006, Serbia deposited on 19 September 2006 with the Director General of WIPO a declaration the effect of which is that the PCT continues to be applicable as far as Serbia is concerned.

Effect in Serbia of International Applications under the PCT

(2)(a) Pursuant to the deposit of the declaration of continued application referred to in paragraph (1), nationals and residents of Serbia can file international applications, and Serbia is automatically designated in international applications filed on or after 4 June 2006.

(b) As regards any international application the international filing date of which is prior to 4 June 2006, and in which the State Union of Serbia and Montenegro was designated, the “national filing effect” of any such application under Article 11(4) of the PCT will, pursuant to the deposit by Serbia of its declaration of continued application, be recognized in Serbia (provided that the international application had not lost its effect in the State Union of Serbia and Montenegro by 3 June 2006). The conditions under which any such international application, or any patent resulting therefrom granted by the Intellectual Property Office of Serbia and Montenegro, may continue to have effect in Serbia are the following:

MODIFICATIONS OF THE ADMINISTRATIVE INSTRUCTIONS UNDER THE PCT**NOTE PREPARED BY THE INTERNATIONAL BUREAU**

Following the work undertaken by the Meeting of International Authorities under the Patent Cooperation Treaty, at its seventh and tenth sessions, both held in Geneva, from 10 to 14 February 2003 and from 13 to 15 September 2004, respectively, modifications have been made to Annex B of the Administrative Instructions under the PCT.

The modifications involve:

- (i) the deletion of Part 2, Annex B, of the Administrative Instructions under the PCT (which contain examples illustrating unity of invention practice),
- (ii) the addition of a reference to the new location of the examples in the PCT International Search and Preliminary Examination Guidelines (see Chapter 10),
- (iii) a minor modification of a substantive nature concerning the “Markush practice”, which can also be found in the PCT International Search and Preliminary Examination Guidelines (see paragraph 10.17(b)).

After consultation with the interested Offices and Authorities pursuant to PCT Rule 89.2(b), the modifications to Annex B of the Administrative Instructions as set out on pages 7056, 7058, 7060, 7062 and 7064 are promulgated, with effect from 1 April 2005.

TEXT OF THE ADMINISTRATIVE INSTRUCTIONS**ANNEX B
UNITY OF INVENTION**

(a) Unity of Invention. Rule 13.1 deals with the requirement of unity of invention and states the principle that an international application should relate to only one invention or, if there is more than one invention, that the inclusion of those inventions in one international application is only permitted if all inventions are so linked as to form a single general inventive concept.

(b) Technical Relationship. Rule 13.2 defines the method for determining whether the requirement of unity of invention is satisfied in respect of a group of inventions claimed in an international application. Unity of invention exists only when there is a technical relationship among the claimed inventions involving one or more of the same or corresponding “special technical features”. The expression “special technical features” is defined in Rule 13.2 as meaning those technical features that define a contribution which each of the inventions, considered as a whole, makes over the prior art. The determination is made on the contents of the claims as interpreted in light of the description and drawings (if any).

(c) Independent and Dependent Claims. Unity of invention has to be considered in the first place only in relation to the independent claims in an international application and not the dependent claims. By “dependent” claim is meant a claim which contains all the features of another claim and is in the same category of claim as that other claim (the expression “category of claim” referring to the classification of claims according to the subject matter of the invention claimed—for example, product, process, use or apparatus or means, etc.).

MODIFICATIONS DES INSTRUCTIONS ADMINISTRATIVES DU PCT**NOTE DU BUREAU INTERNATIONAL**

Suite aux travaux entrepris par la Réunion des administrations internationales selon le Traité de coopération en matière de brevets lors de ses septième et dixième sessions, qui se sont tenues à Genève du 10 au 14 février 2003 et du 13 au 15 septembre 2004, respectivement, des modifications ont été apportées à l'annexe B des Instructions administratives du PCT.

Ces modifications comportent :

- (i) la suppression de la deuxième partie de l'annexe B des instructions administratives du PCT (qui contient des exemples illustrant la pratique de l'unité de l'invention),
- (ii) l'addition d'une référence à ces exemples tels qu'ils figurent désormais dans les Directives concernant la recherche internationale et l'examen préliminaire international selon le PCT (au chapitre 10),
- (iii) une modification mineure, mais substantielle, relative à la "doctrine Markush", qui se trouve aussi dans les directives précitées (au paragraphe 10.17.b)).

Après consultation avec les offices et les administrations intéressés conformément à la règle 89.2.b) du PCT, les modifications de l'annexe B des instructions administratives figurant aux pages 7057, 7059, 7061, 7063 et 7065 sont promulguées, avec effet au 1^{er} avril 2005.

TEXTE DES INSTRUCTIONS ADMINISTRATIVES**ANNEXE B
L'UNITÉ DE L'INVENTION**

a) Unité de l'invention. La règle 13.1, qui concerne l'unité de l'invention, énonce le principe que la demande internationale doit porter sur une seule invention ou que, en cas de pluralité d'inventions, ces inventions ne peuvent faire l'objet d'une même demande internationale que si elles sont toutes liées entre elles de manière à ne former qu'un seul concept inventif général.

b) Relation technique. La règle 13.2 définit la méthode à suivre pour apprécier si l'exigence d'unité de l'invention est respectée lorsqu'une pluralité d'inventions est revendiquée dans une demande internationale. L'unité de l'invention suppose entre les inventions revendiquées une relation technique portant sur un ou plusieurs "éléments techniques particuliers" identiques ou correspondants. L'expression "éléments techniques particuliers" est définie dans la règle 13.2 comme désignant les éléments techniques qui déterminent une contribution de chacune des inventions, considérée comme un tout, par rapport à l'état de la technique. Cette appréciation est fondée sur le contenu des revendications, interprété à la lumière de la description, et des dessins éventuels.

c) Revendications indépendantes et dépendantes. Le critère de l'unité de l'invention ne doit tout d'abord être appliqué qu'aux revendications indépendantes et non aux revendications dépendantes. Par revendication "dépendante", il faut entendre une revendication comprenant toutes les caractéristiques d'une autre revendication et appartenant à la même catégorie que celle-ci (l'expression "catégorie de revendication" se rapportant au classement des revendications selon l'objet de l'invention revendiquée – par exemple, produit, procédé, utilisation, appareil ou moyen, etc.).

MODIFICATIONS OF THE ADMINISTRATIVE INSTRUCTIONS (cont'd)**TEXT OF THE ADMINISTRATIVE INSTRUCTIONS (cont'd)**

(i) If the independent claims avoid the prior art and satisfy the requirement of unity of invention, no problem of lack of unity arises in respect of any claims that depend on the independent claims. In particular, it does not matter if a dependent claim itself contains a further invention. Equally, no problem arises in the case of a genus/species situation where the genus claim avoids the prior art. Moreover, no problem arises in the case of a combination/subcombination situation where the subcombination claim avoids the prior art and the combination claim includes all the features of the subcombination.

(ii) If, however, an independent claim does not avoid the prior art, then the question whether there is still an inventive link between all the claims dependent on that claim needs to be carefully considered. If there is no link remaining, an objection of lack of unity *a posteriori* (that is, arising only after assessment of the prior art) may be raised. Similar considerations apply in the case of a genus/species or combination/subcombination situation.

(iii) This method for determining whether unity of invention exists is intended to be applied even before the commencement of the international search. Where a search of the prior art is made, an initial determination of unity of invention, based on the assumption that the claims avoid the prior art, may be reconsidered on the basis of the results of the search of the prior art.

(d) Illustrations of Particular Situations. There are three particular situations for which the method for determining unity of invention contained in Rule 13.2 is explained in greater detail:

- (i) combinations of different categories of claims;
- (ii) so-called “Markush practice”; and
- (iii) intermediate and final products.

Principles for the interpretation of the method contained in Rule 13.2, in the context of each of those situations are set out below. It is understood that the principles set out below are, in all instances, interpretations of and not exceptions to the requirements of Rule 13.2.

Examples to assist in understanding the interpretation on the three areas of special concern referred to in the preceding paragraph are set out below.

(e) Combinations of Different Categories of Claims. The method for determining unity of invention under Rule 13.2 shall be construed as permitting, in particular, the inclusion of any one of the following combinations of claims of different categories in the same international application:

- (i) in addition to an independent claim for a given product, an independent claim for a process specially adapted for the manufacture of the said product, and an independent claim for a use of the said product, or
- (ii) in addition to an independent claim for a given process, an independent claim for an apparatus or means specifically designed for carrying out the said process, or

MODIFICATIONS DES INSTRUCTIONS ADMINISTRATIVES (suite)**TEXTE DES INSTRUCTIONS ADMINISTRATIVES (suite)**

i) Si les revendications indépendantes n'empiètent pas sur l'état de la technique et satisfont à l'exigence d'unité de l'invention, il ne saurait être question de défaut d'unité en ce qui concerne les revendications qui en dépendent. En particulier, il est indifférent que la revendication dépendante contienne ou non une autre invention. De la même façon, il n'y a pas de difficulté lorsqu'il est question de genre et d'espèce et que la revendication relative au genre n'empiète pas sur l'état de la technique, pas plus que dans le cas d'une combinaison et d'une sous-combinaison lorsque la revendication relative à la sous-combinaison n'empiète pas sur l'état de la technique et que la revendication relative à la combinaison comprend tous les éléments de la sous-combinaison.

ii) Si toutefois une revendication indépendante empiète sur l'état de la technique, il convient d'étudier attentivement s'il existe encore un lien, sur le plan du caractère inventif, entre toutes les revendications dépendant de cette revendication. En l'absence de ce lien, il peut y avoir lieu de formuler une objection pour défaut d'unité constaté ultérieurement (c'est-à-dire seulement après appréciation de l'état de la technique). Des considérations de même nature entrent en ligne de compte dans les cas du type genre/espèce ou combinaison/sous-combinaison.

iii) Cette méthode d'appréciation de l'unité de l'invention devrait pouvoir être appliquée même avant le commencement de la recherche internationale. S'il est procédé à une recherche par rapport à l'état de la technique, une décision initiale concluant à l'unité de l'invention, fondée sur l'hypothèse que les revendications n'empiètent pas sur l'état de la technique, peut être reconsidérée en fonction des résultats de la recherche.

d) Cas particuliers d'application. La méthode d'appréciation de l'unité de l'invention exposée dans la règle 13.2 va être expliquée de façon plus détaillée pour trois cas particuliers :

- i) combinaisons de différentes catégories de revendications,
- ii) application de la "doctrine Markush" et
- iii) présence de produits intermédiaires et finals.

Les principes régissant l'interprétation, dans chacun de ces trois cas, de la méthode exposée dans la règle 13.2 sont énoncés ci-après. Il est entendu que ces principes sont en toute hypothèse des interprétations des conditions énoncées dans la règle 13.2 et non des exceptions à celle-ci.

On trouvera ci-après des exemples qui aideront à comprendre l'interprétation de la méthode dans les trois cas particuliers évoqués au paragraphe précédent.

e) Combinaisons de différentes catégories de revendications. La méthode d'appréciation de l'unité de l'invention exposée dans la règle 13.2 doit être interprétée comme permettant, en particulier, de faire figurer dans une même demande internationale l'une quelconque des combinaisons suivantes de revendications de catégories différentes :

- i) outre une revendication indépendante concernant un produit donné, une revendication indépendante concernant un procédé spécialement conçu pour la fabrication dudit produit et une revendication indépendante concernant une utilisation dudit produit, ou
- ii) outre une revendication indépendante concernant un procédé donné, une revendication indépendante concernant un appareil ou moyen spécialement conçu pour la mise en œuvre dudit procédé, ou

MODIFICATIONS OF THE ADMINISTRATIVE INSTRUCTIONS (cont'd)**TEXT OF THE ADMINISTRATIVE INSTRUCTIONS (cont'd)**

- (iii) in addition to an independent claim for a given product, an independent claim for a process specially adapted for the manufacture of the said product and an independent claim for an apparatus or means specifically designed for carrying out the said process,

it being understood that a process is specially adapted for the manufacture of a product if it inherently results in the product and that an apparatus or means is specifically designed for carrying out a process if the contribution over the prior art of the apparatus or means corresponds to the contribution the process makes over the prior art.

Thus, a process shall be considered to be specially adapted for the manufacture of a product if the claimed process inherently results in the claimed product with the technical relationship being present between the claimed product and claimed process. The words “specially adapted” are not intended to imply that the product could not also be manufactured by a different process.

Also an apparatus or means shall be considered to be “specifically designed for carrying out” a claimed process if the contribution over the prior art of the apparatus or means corresponds to the contribution the process makes over the prior art. Consequently, it would not be sufficient that the apparatus or means is merely capable of being used in carrying out the claimed process. However, the expression “specifically designed” does not imply that the apparatus or means could not be used for carrying out another process, nor that the process could not be carried out using an alternative apparatus or means.

(f) “Markush Practice”. The situation involving the so-called “Markush practice” wherein a single claim defines alternatives (chemical or non-chemical) is also governed by Rule 13.2. In this special situation, the requirement of a technical interrelationship and the same or corresponding special technical features as defined in Rule 13.2, shall be considered to be met when the alternatives are of a similar nature.

(i) When the Markush grouping is for alternatives of chemical compounds, they shall be regarded as being of a similar nature where the following criteria are fulfilled:

- (A) all alternatives have a common property or activity, and
- (B)(1) a common structure is present, i.e., a significant structural element is shared by all of the alternatives, or
- (B)(2) in cases where the common structure cannot be the unifying criteria, all alternatives belong to a recognized class of chemical compounds in the art to which the invention pertains.

(ii) In paragraph (f)(i)(B)(1), above, the words “significant structural element is shared by all of the alternatives” refer to cases where the compounds share a common chemical structure which occupies a large portion of their structures, or in case the compounds have in common only a small portion of their structures, the commonly shared structure constitutes a structurally distinctive portion in view of existing prior art, and the common structure is essential to the common property or activity. The structural element may be a single component or a combination of individual components linked together.

MODIFICATIONS DES INSTRUCTIONS ADMINISTRATIVES (suite)**TEXTE DES INSTRUCTIONS ADMINISTRATIVES (suite)**

- iii) outre une revendication indépendante concernant un produit donné, une revendication indépendante concernant un procédé spécialement conçu pour la fabrication dudit produit et une revendication indépendante concernant un appareil ou moyen spécialement conçu pour la mise en œuvre dudit procédé,

étant entendu qu'un procédé est spécialement conçu pour la fabrication d'un produit s'il aboutit intrinsèquement à l'obtention du produit et qu'un appareil ou un moyen est spécialement conçu pour la mise en œuvre d'un procédé si sa contribution par rapport à l'état de la technique correspond à la contribution du procédé par rapport à l'état de la technique.

Ainsi, un procédé doit être considéré comme spécialement conçu pour la fabrication d'un produit si le procédé revendiqué aboutit intrinsèquement à l'obtention du produit revendiqué et s'il existe une relation technique entre le produit revendiqué et le procédé revendiqué. Les mots "spécialement conçu" n'excluent pas que le produit puisse être fabriqué à l'aide d'un procédé différent.

Un appareil ou un moyen doit aussi être considéré comme "spécialement conçu pour la mise en œuvre" d'un procédé revendiqué si sa contribution par rapport à l'état de la technique correspond à la contribution du procédé par rapport à l'état de la technique. Par conséquent, il ne serait pas suffisant que l'appareil ou que le moyen soit simplement susceptible de servir à mettre en œuvre le procédé revendiqué. Cependant, les mots "spécialement conçu" n'excluent pas que l'appareil ou le moyen puisse être utilisé pour mettre en œuvre un autre procédé, ni que le procédé puisse être mis en œuvre à l'aide d'un autre appareil ou d'un autre moyen.

f) "Doctrine Markush". Le cas de l'application de la "doctrine Markush", dans le cadre de laquelle une seule revendication définit des variantes (chimiques ou non chimiques), est aussi régi par la règle 13.2. Dans ce cas particulier, la condition relative à l'existence d'une relation technique et à la présence d'éléments techniques particuliers identiques ou correspondants énoncée dans la règle 13.2 doit être considérée comme remplie lorsque les variantes sont de nature analogue.

i) Lorsqu'il s'agit de grouper, selon la pratique découlant de l'application de la doctrine Markush, des variantes de composés chimiques, ces variantes doivent être considérées comme ayant un caractère analogue si elles répondent aux critères suivants :

A) toutes les variantes ont une propriété ou une activité commune et

B)1) il existe une structure commune, c'est-à-dire que toutes les variantes ont en commun un élément structurel important, ou bien,

B)2) lorsque la structure commune ne peut constituer l'élément unificateur, toutes les variantes appartiennent à une classe reconnue de composés chimiques dans le domaine dont relève l'invention.

ii) A l'alinéa f)i)B)1) ci-dessus, les mots "toutes les variantes ont en commun un élément structurel important" visent les cas dans lesquels les composés ont en commun une structure chimique qui occupe une grande partie de leur structure ou, si les composés n'ont en commun qu'une petite partie de leur structure, la structure qui leur est commune constitue en soi une partie distincte par rapport à l'état de la technique et la structure commune est essentielle à la propriété ou à l'activité commune. L'élément structurel peut consister en un seul composant ou en un ensemble de divers composants liés les uns aux autres.

MODIFICATIONS OF THE ADMINISTRATIVE INSTRUCTIONS (cont'd)**TEXT OF THE ADMINISTRATIVE INSTRUCTIONS (cont'd)**

(iii) In paragraph (f)(i)(B)(2), above, the words “recognized class of chemical compounds” mean that there is an expectation from the knowledge in the art that members of the class will behave in the same way in the context of the claimed invention. In other words, each member could be substituted one for the other, with the expectation that the same intended result would be achieved.

(iv) The fact that the alternatives of a Markush grouping can be differently classified shall not, taken alone, be considered to be justification for a finding of a lack of unity of invention.

(v) When dealing with alternatives, if it can be shown that at least one Markush alternative is not novel over the prior art, the question of unity of invention shall be reconsidered by the examiner. Reconsideration does not necessarily imply that an objection of lack of unity shall be raised.

(g) Intermediate and Final Products. The situation involving intermediate and final products is also governed by Rule 13.2.

(i) The term “intermediate” is intended to mean intermediate or starting products. Such products have the ability to be used to produce final products through a physical or chemical change in which the intermediate loses its identity.

(ii) Unity of invention shall be considered to be present in the context of intermediate and final products where the following two conditions are fulfilled:

(A) the intermediate and final products have the same essential structural element, in that:

- (1) the basic chemical structures of the intermediate and the final products are the same, or
- (2) the chemical structures of the two products are technically closely interrelated, the intermediate incorporating an essential structural element into the final product, and

(B) the intermediate and final products are technically interrelated, this meaning that the final product is manufactured directly from the intermediate or is separated from it by a small number of intermediates all containing the same essential structural element.

(iii) Unity of invention may also be considered to be present between intermediate and final products of which the structures are not known—for example, as between an intermediate having a known structure and a final product the structure of which is not known, or as between an intermediate of unknown structure and a final product of unknown structure. In order to satisfy unity in such cases, there shall be sufficient evidence to lead one to conclude that the intermediate and final products are technically closely interrelated as, for example, when the intermediate contains the same essential element as the final product or incorporates an essential element into the final product.

MODIFICATIONS DES INSTRUCTIONS ADMINISTRATIVES (suite)**TEXTE DES INSTRUCTIONS ADMINISTRATIVES (suite)**

iii) A l'alinéa f)i)B)2) ci-dessus, les mots "classe reconnue de composés chimiques" signifient que l'on peut s'attendre, compte tenu des connaissances acquises dans le domaine en cause, que les éléments de la classe se comportent de la même façon dans le contexte de l'invention revendiquée. En d'autres termes, il serait possible de remplacer chaque élément par un autre, en escomptant le même résultat.

iv) Le fait que les variantes correspondant à un groupement de type Markush peuvent être classées différemment ne doit pas, en soi, être considéré comme une raison suffisante pour conclure à un défaut d'unité de l'invention.

v) Face à des variantes, s'il est possible de démontrer qu'au moins une variante de type Markush n'est pas nouvelle par rapport à l'état de la technique, l'examineur doit revenir sur la question de l'unité de l'invention. Cela ne signifie pas nécessairement qu'une objection pour défaut d'unité sera élevée.

g) Produits intermédiaires et finals. La règle 13.2 s'applique aussi au cas des produits intermédiaires et des produits finals.

i) L'expression "intermédiaires" désigne les produits intermédiaires ou de départ. Ces produits ont pour caractéristique qu'ils peuvent servir à obtenir des produits finals au moyen d'une modification physique ou chimique dans laquelle le produit intermédiaire en cause perd son identité.

ii) On doit considérer qu'il y a unité de l'invention, par rapport à des produits intermédiaires et finals, lorsque les deux conditions suivantes sont remplies :

- A) les produits intermédiaire et final ont le même élément structurel essentiel, c'est-à-dire que
 - 1) les structures chimiques fondamentales des produits intermédiaire et final sont identiques, ou
 - 2) les structures chimiques des deux produits sont étroitement liées sur le plan technique, le produit intermédiaire introduisant un élément structurel essentiel dans le produit final, et
- B) les produits intermédiaire et final sont techniquement interdépendants, ce qui signifie que le produit final est obtenu directement à partir du produit intermédiaire ou en est séparé par un petit nombre de produits intermédiaires contenant tous le même élément structurel essentiel.

iii) On peut aussi considérer qu'il y a unité de l'invention entre des produits intermédiaires et finals dont les structures ne sont pas connues, par exemple entre un produit intermédiaire ayant une structure connue et un produit final dont la structure n'est pas connue ou entre un produit intermédiaire et un produit final dont les structures ne sont pas connues. Pour qu'il soit satisfait à l'exigence d'unité de l'invention dans ces cas, il faut que suffisamment d'éléments soient réunis pour permettre de conclure que les produits intermédiaires et finals sont étroitement liés sur le plan technique comme c'est le cas, par exemple, lorsque le produit intermédiaire contient le même élément essentiel que le produit final ou introduit un élément essentiel dans le produit final.

MODIFICATIONS OF THE ADMINISTRATIVE INSTRUCTIONS (cont'd)**TEXT OF THE ADMINISTRATIVE INSTRUCTIONS (cont'd)**

(iv) It is possible to accept in a single international application different intermediate products used in different processes for the preparation of the final product, provided that they have the same essential structural element.

(v) The intermediate and final products shall not be separated, in the process leading from one to the other, by an intermediate which is not new.

(vi) If the same international application claims different intermediates for different structural parts of the final product, unity shall not be regarded as being present between the intermediates.

(vii) If the intermediate and final products are families of compounds, each intermediate compound shall correspond to a compound claimed in the family of the final products. However, some of the final products may have no corresponding compound in the family of the intermediate products so that the two families need not be absolutely congruent.

(h) As long as unity of invention can be recognized applying the above interpretations, the fact that, besides the ability to be used to produce final products, the intermediates also exhibit other possible effects or activities shall not affect the decision on unity of invention.

(i) Rule 13.3 requires that the determination of the existence of unity of invention be made without regard to whether the inventions are claimed in separate claims or as alternatives within a single claim.

(j) Rule 13.3 is not intended to constitute an encouragement to the use of alternatives within a single claim, but is intended to clarify that the criterion for the determination of unity of invention (namely, the method contained in Rule 13.2) remains the same regardless of the form of claim used.

(k) Rule 13.3 does not prevent an International Searching or Preliminary Examining Authority or an Office from objecting to alternatives being contained within a single claim on the basis of considerations such as clarity, the conciseness of claims or the claims fee system applicable in that Authority or Office.

(l) Examples giving guidance on how these principles may be interpreted in particular cases are set out in the PCT International Search and Preliminary Examination Guidelines.

MODIFICATIONS DES INSTRUCTIONS ADMINISTRATIVES (suite)**TEXTE DES INSTRUCTIONS ADMINISTRATIVES (suite)**

iv) Il est permis de faire figurer dans une même demande internationale différents produits intermédiaires utilisés dans différents procédés en vue d'obtenir le produit final, à condition qu'ils aient le même élément structurel essentiel.

v) Les produits intermédiaire et final ne doivent pas être séparés, au cours du procédé menant de l'un à l'autre, par un produit intermédiaire qui n'est pas nouveau.

vi) Si la même demande internationale revendique différents produits intermédiaires pour différentes parties de la structure du produit final, on ne considère pas qu'il y a unité entre les produits intermédiaires en question.

vii) Si les produits intermédiaires et finals sont des familles de composés, chaque composé intermédiaire doit correspondre à un composé revendiqué dans la famille des produits finals. Toutefois, il peut arriver que les produits finals n'aient aucun composé correspondant dans la famille des produits intermédiaires de sorte que les deux familles ne doivent pas absolument concorder.

h) Dès lors que l'on peut conclure à l'unité de l'invention en application des interprétations ci-dessus, le fait que, outre qu'ils peuvent servir à obtenir des produits finals, les produits intermédiaires présentent aussi d'autres effets ou actions possibles ne doit pas avoir d'incidence sur la décision à prendre en ce qui concerne l'unité de l'invention.

i) La règle 13.3 exige que l'unité de l'invention soit appréciée sans égard au fait que les inventions font l'objet de revendications distinctes ou sont présentées comme des variantes dans le cadre d'une seule et même revendication.

j) La règle 13.3 n'a pas pour but d'encourager le recours à des variantes dans une même revendication mais de préciser que le critère d'appréciation de l'unité de l'invention (à savoir la méthode exposée dans la règle 13.2) reste le même, quel que soit le mode de présentation des revendications.

k) La règle 13.3 n'empêche pas une administration chargée de la recherche ou de l'examen préliminaire international ou un office de s'opposer à ce que des variantes figurent dans une seule et même revendication, par exemple pour des raisons de clarté et de concision des revendications ou du fait du système de taxes appliqué par cette administration ou par cet office en matière de revendications.

(l) Les exemples qui illustrent l'application de ces principes et qui peuvent servir de guide dans des cas particuliers figurent dans les Directives concernant la recherche internationale et l'examen préliminaire international.

NOTIFICATION BY RECEIVING OFFICES****AU Australia**

Since 7 January 2002, any receiving Office having the adequate technical systems in place is able to accept the filing of international applications in electronic form in accordance with Part 7 and Annex F of the Administrative Instructions containing, respectively, the legal framework and technical standard necessary to enable the implementation of filing and processing in electronic form of international applications, as provided for under PCT Rule 89*bis*.1.

Pursuant to PCT Rule 89*bis*.1(d), no national Office or intergovernmental organization is obliged to receive or process international applications filed in electronic form or by electronic means unless it has notified the International Bureau that it is prepared to do so in compliance with the applicable provisions of the Administrative Instructions. Any such notification shall be promptly published by the International Bureau in the Gazette, including information on the receiving Offices' requirements and practices with regard to the filing of international applications in electronic form (see Section 710(a) of the Administrative Instructions).

On 7 April 2002, the Australian Patent Office (IP Australia) notified the International Bureau of a transitional reservation under Section 703(f), under which items (ii) to (iv) of Section 703(b) relating to, respectively, the means of transmittal, the electronic document packaging and the electronic filing software were not compatible with the applicable national law and technical systems of the Office, and informing that it consequently did not have to comply with the requirements contained in sections 5.1 and 5.2.1 of Annex F and in sections 2(d), (f) and (g) of Appendix III of Annex F of the Administrative Instructions (for further details, see PCT Gazette No. 18/2002, dated 2 May 2002, page 8974).

On 14 July 2005, the **Australian Patent Office**, in its capacity as receiving Office, notified the International Bureau that it withdraws its transitional reservation as far as section 5.2.1 of Annex F and sections 2(f) and (g) of Appendix III of Annex F are concerned (the transitional reservation relating to section 5.1 of Annex F and section 2(d) of Appendix III of Annex F is maintained) with effect from 18 July 2005, and that, with effect from that same date, it is prepared to receive and process international applications in electronic form provided that they are filed by users already registered with the Office for that purpose under its PCT-SAFE pilot introduction program for the filing of international applications in electronic form, in accordance with the following options and requirements:

Access to the Online Lodgement System requires user id and password authentication via a customer registration process through the Office's Online Services. Where the application exceeds 20 MB, online transmittal is not supported and the application shall then be filed under the PCT-SAFE's EASY mode.

MODIFICATIONS OF THE PCT RECEIVING OFFICE GUIDELINES**NOTE PREPARED BY THE INTERNATIONAL BUREAU**

After consultation with the receiving Offices under the PCT, the modification of paragraph 192C(ii) of the PCT Receiving Office Guidelines is promulgated with effect from 1 October 2005. The modification involves the signature of the declaration of inventorship referred to under PCT Rule 4.17(iv).

TEXT OF THE PCT RECEIVING OFFICE GUIDELINES

192C. Where the request contains one or more declarations referred to in Rule 4.17, the receiving Office may check (Rule 26*ter*.2(a)) that:

(i) each declaration is worded as prescribed by Sections 211 to 215, as applicable, and indicates the designated States to which it applies (as explained in the Notes to the request form). The standardized wording of the declaration of inventorship which is applicable only for the purpose of the designation of the United States of America is pre-printed in Box No. VIII (iv) since no part of that wording may be omitted by the applicant;

(ii) any declaration of inventorship in Box No. VIII (iv) is signed and dated directly by the inventor for the United States of America – a signature by an appointed agent is not sufficient for that purpose.

The receiving Office carries out no further checks on any declarations contained in the request form. In particular, it does not check that the name(s) and address(es) of the person(s) making a declaration correspond to the name(s) and address(es) of the applicant(s) or inventor(s) indicated in Boxes Nos. II and III of the request form. It also does not check for the purposes of which State a given declaration is made under Rule 4.17.

**FILING AND PROCESSING IN ELECTRONIC FORM OF INTERNATIONAL APPLICATIONS:
NOTIFICATION BY RECEIVING OFFICES****AU Australia**

Since 7 January 2002, any receiving Office having the adequate technical systems in place is able to accept the filing of international applications in electronic form in accordance with Part 7 and Annex F of the Administrative Instructions under the PCT containing, respectively, the legal framework and technical standard necessary to enable the implementation of filing and processing in electronic form of international applications, as provided for under PCT Rule 89*bis*.1.

On 7 April 2002, the **Australian Patent Office (IP Australia)**, in its capacity as receiving Office, notified the International Bureau of a transitional reservation under Section 703(f) of the Administrative Instructions, under which items (ii) to (iv) of Section 703(b) relating to, respectively, the means of transmittal, the electronic document packaging and the electronic filing software were not compatible with the applicable national law and technical systems of the Office; consequently, the Office did not have to comply with the requirements contained in sections 5.1 and 5.2.1 of Annex F and in sections 2(d), (f) and (g) of Appendix III of Annex F of the Administrative Instructions (for further details, see PCT Gazette No. 18/2002, dated 2 May 2002, page 8974).

On 14 July 2005, the Australian Patent Office, in its capacity as receiving Office, notified the International Bureau that it was withdrawing its transitional reservation as far as section 5.2.1 of Annex F and sections 2(f) and (g) of Appendix III of Annex F were concerned (the transitional reservation relating to section 5.1 of Annex F and section 2(d) of Appendix III of Annex F was maintained) with effect from 18 July 2005, and that, with effect from that same date, it was prepared to receive and process international applications in electronic form provided that they were filed by users already registered with the Office for that purpose under its PCT-SAFE pilot introduction program for the filing of international applications in electronic form (for further details, see PCT Gazette No. 31/2005, dated 4 August 2005, page 20184).

On 24 November 2005, the Australian Patent Office, in its capacity as receiving Office, notified the International Bureau that the international application online filing system pilot program, implemented on 18 July 2005, would end on 15 December 2005 and that, with effect from that date, the Office is prepared to receive any international application in electronic form that complies with the necessary requirements. The restriction to filings by registered pilot users will no longer apply.

More detailed information about how to file international applications in electronic form with the Australian Patent Office, in its capacity as receiving Office, is available on the Office website at www.ipaustralia.gov.au.

In accordance with Section 710(b), the Australian Patent Office, in its capacity as receiving Office, informed the International Bureau of its requirements and practices with regard to the filing of international applications in electronic form. Those requirements and practices are the same as those already notified in the above-mentioned PCT Gazette No. 31/2005. They are hereby reproduced for information purposes:

**DÉPÔT ET TRAITEMENT SOUS FORME ÉLECTRONIQUE DES DEMANDES INTERNATIONALES:
NOTIFICATION DES OFFICES RÉCEPTEURS****AU Australie**

Depuis le 7 janvier 2002, tout office récepteur ayant mis en place les systèmes techniques appropriés est en mesure d'accepter le dépôt des demandes internationales sous forme électronique conformément à la septième partie et à l'annexe F des Instructions administratives du PCT qui contiennent, respectivement, le cadre juridique et la norme technique nécessaires à la mise en œuvre du dépôt et du traitement sous forme électronique des demandes internationales prévus à la règle 89*bis*.1 du PCT.

Le 7 avril 2002, l'**Office australien des brevets (IP Australia)**, agissant en sa qualité d'office récepteur, a notifié au Bureau international une réserve transitoire en vertu de l'instruction administrative 703.f), selon laquelle les points ii) à iv) de l'instruction 703.b) relatifs, respectivement, aux moyens de transmission, à l'emballage électronique des documents et aux logiciels de dépôt électronique n'étaient pas compatibles avec la législation nationale applicable et les systèmes techniques de l'office; l'office n'était, par conséquent, pas tenu de satisfaire aux exigences énoncées aux sections 5.1 et 5.2.1 de l'annexe F et aux sections 2.d), f) et g) de l'appendice III de l'annexe F des instructions administratives (pour de plus amples détails, voir la Gazette du PCT n° 18/2002, du 2 mai 2002, page 8975).

Le 14 juillet 2005, l'Office australien des brevets, agissant en sa qualité d'office récepteur, a notifié au Bureau international qu'il retirait sa réserve transitoire en ce qui concernait la section 5.2.1 de l'annexe F et les sections 2.f) et g) de l'appendice III de l'annexe F (la réserve transitoire relative à la section 5.1 de l'annexe F et à la section 2.d) de l'appendice III de l'annexe F était maintenue) à compter du 18 juillet 2005, et qu'à partir de cette même date, il était disposé à recevoir et à traiter les demandes internationales sous forme électronique à condition qu'elles soient déposées par des utilisateurs déjà enregistrés à cette fin auprès de l'office dans le cadre de son programme pilote d'introduction du logiciel PCT-SAFE pour le dépôt des demandes internationales sous forme électronique (pour de plus amples détails, voir la Gazette du PCT n° 31/2005, du 4 août 2005, page 20185).

Le 24 novembre 2005, l'Office australien des brevets, agissant en sa qualité d'office récepteur, a notifié au Bureau international que le programme pilote relatif au système de dépôt en ligne des demandes internationales, mis en œuvre le 18 juillet 2005, prendrait fin le 15 décembre 2005, date à compter de laquelle il est disposé à recevoir toute demande internationale sous forme électronique qui remplit les exigences nécessaires. La restriction consistant à ne permettre le dépôt sous forme électronique qu'aux utilisateurs enregistrés dans le cadre du programme pilote ne s'appliquera plus.

Des informations plus détaillées sur la manière de déposer des demandes internationales sous forme électronique auprès de l'Office australien des brevets, agissant en sa qualité d'office récepteur, sont disponibles sur le site Internet de l'office à l'adresse suivante : www.ipaustralia.gov.au.

Conformément à l'instruction 710.b), l'Office australien des brevets, agissant en sa qualité d'office récepteur, a informé le Bureau international de ses exigences et pratiques en matière de dépôt des demandes internationales sous forme électronique. Ces exigences et pratiques sont les mêmes que celles qui ont déjà été notifiées dans la Gazette du PCT n° 31/2005 précitée. Elles sont reproduites ci-après à des fins d'information:

Where the application exceeds 20 MB, online transmittal is not supported and the application shall then be filed under the PCT-SAFE's EASY mode.

As to electronic document packaging (Section 710(a)(i)):

– WASP (Wrapped and Signed Package; see Annex F, section 4.2.1)

As to electronic filing software (Section 710(a)(i)):

L'office fera tout son possible pour accepter une demande internationale sous forme électronique. Un accusé de réception est généré pour tout ce qui est supposé constituer une demande internationale déposée sous forme électronique auprès de l'office. NOTIFICATIONS BY INTERNATIONAL PRELIMINARY EXAMINING AUTHORITIES OF APPLICABILITY OF PCT RULE 66.1bis(b)

During its thirty-first (18th extraordinary) session, held in Geneva from 23 September to 1 October 2002, the Assembly of the International Patent Cooperation Union (PCT Union) unanimously adopted, amongst others, an amendment to Rule 66 of the PCT Regulations concerning the procedure before the International Preliminary Examining Authority. This amended Rule, which entered into force on 1 January 2004, was published in PCT Gazette No. 49/2002, page 25040, on 5 December 2002.

It is recalled that Rule 66.1bis(b) states that: “An International Preliminary Examining Authority may notify the International Bureau that paragraph (a) shall not apply to the procedure before it in respect of written opinions established under Rule 43bis.1 by the International Searching Authority or Authorities specified in the notification, provided that such a notification shall not apply to cases where the national Office or intergovernmental organization that acted as International Searching Authority is also acting as International Preliminary Examining Authority. The International Bureau shall promptly publish any such notification in the Gazette.”

The European Patent Office (EPO), in its capacity as an International Preliminary Examining Authority, has notified the International Bureau under Rule 66.1bis(b) that Rule 66.1bis(a) shall apply as follows:

“[...] the EPO will not consider a written opinion performed by any ISA other than the EPO itself as a written opinion of the IPEA for the purposes of Rule 66.2(a) PCT. This means that Rule 66.1bis(a) PCT will not apply to the procedure before the EPO as IPEA in respect of written opinions established under Rule 43bis.1 PCT by the Austrian Patent Office, the Swedish Patent Office, the Spanish Patent and Trademark Office or by the Finnish Patent Office when it commences its activity as an ISA or by any other industrial property office which may be appointed as an ISA in the future.”

NOTIFICATIONS DES ADMINISTRATIONS CHARGÉES DE L'EXAMEN PRÉLIMINAIRE INTERNATIONAL RELATIVES À L'APPLICABILITÉ DE LA RÈGLE 66.1bis.b) DU PCT

Durant sa trente et unième session (18^e session extraordinaire), qui s'est tenue à Genève du 23 septembre au 1^{er} octobre 2002, l'Assemblée de l'Union internationale de coopération en matière de brevets (Union du PCT) a adopté, entre autres, une modification à la règle 66 du règlement d'exécution du PCT concernant la procédure au sein de l'administration chargée de l'examen préliminaire international. Cette règle modifiée, qui est entrée en vigueur le 1^{er} janvier 2004, a été publiée dans la Gazette du PCT n° 49/2002, page 25041, le 5 décembre 2002.

Il est rappelé que la règle 66.1bis.b) stipule que : “Toute administration chargée de l'examen préliminaire international peut notifier au Bureau international que l'alinéa a) ne s'applique pas à sa propre procédure à l'égard des opinions écrites établies en vertu de la règle 43bis.1 par l'administration chargée de la recherche internationale ou les administrations indiquées dans la notification, étant entendu que cette notification ne s'applique pas dans le cas où l'office national ou l'organisation intergouvernementale qui a agi en tant qu'administration chargée de la recherche internationale agit également en tant qu'administration chargée de l'examen préliminaire international. Le Bureau international publie à bref délai toute notification de ce type dans la gazette.”

L'office européen des brevets (OEB), en sa qualité d'administration chargée de l'examen préliminaire international, a notifié au Bureau international en vertu de la règle 66.1bis.b) que la règle 66.1bis.a) s'applique comme suit (traduction française établie par le Bureau international) :

“L'OEB ne considérera pas une opinion écrite établie par une administration chargée de la recherche internationale autre que l'OEB lui-même comme une opinion écrite de l'administration chargée de l'examen préliminaire international aux fins de la règle 66.2.a) du PCT. Cela signifie que la règle 66.1bis.a) du PCT ne s'appliquera pas à la procédure auprès de l'OEB en tant qu'administration chargée de l'examen préliminaire international vis à vis d'opinions écrites établies en vertu de la règle 43bis.1 du PCT par l'Office autrichien des brevets, l'Office suédois des brevets, l'Office espagnol des brevets et des marques ou par l'Office national des brevets et de l'enregistrement (Finlande) lorsqu'il commencera ses activités en tant qu'administration chargée de la recherche internationale ou par tout autre office de propriété industrielle qui pourrait être nommé à l'avenir en tant qu'administration chargée de la recherche internationale.”

An electronic filing of a patent application will have multiple files associated with it. Filing name conventions need to be established in order to enhance server automation, as well as to establish a client side software workflow and a good work practice for user understanding. The following set of tables constitutes the recommended file naming convention and the client side software should automatically produce the suffixes and extensions accordingly. Each of these tables addresses a level of the standard, followed with tables of examples.

4.3 *Convention recommandée de nommage des fichiers* [Modifiée]

Un dépôt électronique d'une demande de brevet comporte un certain nombre de fichiers associés. L'établissement de conventions de nommage des fichiers permet de renforcer l'automatisation des serveurs, de faciliter le travail produit au niveau du logiciel client et d'établir une bonne pratique de travail aux fins d'une meilleure compréhension par les utilisateurs du système. La série de tableaux qui suit constitue la convention recommandée de nommage des fichiers et les logiciels clients devraient produire de manière automatique les suffixes et les extensions des fichiers en conséquence. Chacun de ces tableaux représente un niveau de la convention, suivie de tableaux présentant des exemples.

MODIFICATIONS OF ANNEX F OF THE ADMINISTRATIVE INSTRUCTIONS (Con'd)*4.3.2 Applicant's identifier*

The applicant's identifier is determined by the applicant with or without the help of the filing tool. The name of every file that is part of a submission will begin with the same applicant's identifier. Applicant's identifier might be a name or a docket number or some other string that has significance to the applicant. An applicant's identifier is not necessarily unique to each submission, that is, it might be used for another submission associated with prosecution of the same application; it could even be used by the applicant for all submissions for all his applications. The applicant's identifier is placed first so that in a directory listing, all the files for a particular submission or application or applicant will sort together.

MODIFICATIONS DE L'ANNEXE F DES INSTRUCTIONS ADMINISTRATIVES (suite)*4.3.2 Identifiant du déposant*

L'identifiant du déposant est choisi par le déposant avec ou sans l'aide du logiciel de dépôt. Le nom des fichiers contenus dans le paquet électronique de la demande internationale commence par le même identifiant. L'identifiant peut être un nom, un numéro d'enregistrement ou une autre chaîne de caractères signifiant quelque chose pour le déposant. L'identifiant peut être utilisé dans d'autres circonstances que pour le seul dépôt de la demande internationale comme par exemple pour nommer les fichiers électroniques présentés à l'office dans le cadre du traitement de la même demande internationale; il pourrait même être utilisé par le déposant dans le cadre de toutes ses demandes internationales. L'identifiant est placé en premier de telle sorte que tous les fichiers relatifs à un dépôt, à une demande internationale ou à un déposant apparaissent ensemble dans le répertoire.

On 21 August 2003, the International Bureau as receiving Office announced that it was prepared to receive international applications in electronic form as from 25 August 2003, *provided that* they were filed by users already registered with the International Bureau as receiving Office for that purpose under the PCT-SAFE pilot, and also announced that electronic filing would be introduced on a wider basis when electronic systems so permitted (see PCT Gazette No. 34/2003, page 19248).

The International Bureau as receiving Office now announces that the PCT-SAFE pilot program will end on 12 February 2004 and that, with effect from that date, it is prepared to receive any international application in electronic form that complies with the necessary requirements. FEES PAYABLE UNDER THE PCT**DE Germany—Corrigendum**

The International Bureau published erroneous information in PCT Gazette No. 49/2003, page 27786, on 4 December 2003, concerning the payment of the annual fee for the third year to the German Patent and Trademark Office as designated (or elected) Office. The correct footnote 3 relating the annual fee for the third year should read as follows:

“It is due on the last day of the month containing the second anniversary (24 months) of the international filing date. If the applicant does not initiate early entry into the national phase, he does not have to pay the third annual fee before the expiration of the 30-month time limit under PCT Article 22(1) or 39(1)(a). In that case, the third annual fee may be paid without surcharge before the expiration of the second month after the expiration of the 30-month time limit. If the third annual fee is not paid within this two-month time limit, the fee may still be paid with a surcharge before the expiration of the sixth month after the expiration of the 30-month time limit.”

TAXES PAYABLES EN VERTU DU PCT**DE Allemagne – rectificatif**

Le Bureau international a publié une information erronée dans la Gazette du PCT n° 49/2003, page 27787, le 4 décembre 2003, concernant le paiement de la taxe annuelle pour la troisième année à l'Office allemand des brevets et des marques en sa qualité d'office désigné (ou élu). La note de bas de page 3 correcte, relative à la taxe annuelle pour la troisième année, doit se lire comme suit :

“Elle est due le dernier jour du mois dans lequel tombe le deuxième anniversaire (24 mois) de la date du dépôt international. Si le déposant ne demande pas l'ouverture anticipée de la phase nationale, il n'a pas à acquitter la taxe annuelle pour la troisième année avant l'expiration d'un délai de 30 mois en vertu de l'article 22.1) ou 39.1.a) du PCT. Dans ce cas, la troisième taxe annuelle peut être acquittée sans surtaxe avant l'expiration du deuxième mois après l'expiration du délai de 30 mois. Si la troisième taxe annuelle n'est pas acquittée dans ce délai de deux mois, elle peut encore être acquittée sans surtaxe avant l'expiration du sixième mois après l'expiration du délai de 30 mois.”

INFORMATION ON CONTRACTING STATES AND INTERGOVERNMENTAL ORGANIZATIONS**EP European Patent Organisation (EPO)****HR Croatia**

Croatia has recently concluded an agreement with the European Patent Organisation (EPO) which provides for the extension of the effects of European patent applications and patents to Croatia. The agreement entered into force on 1 April 2004. Under the agreement, it is possible to obtain patent protection in Croatia by requesting the extension of a European patent to Croatia. The extension procedure is also available, if the necessary requirements are met, via the PCT.

Note that Croatia (country code HR) is not party to the European Patent Convention (EPC) and cannot be designated for a European patent (EP).

The extension of a European patent to Croatia via the PCT is available in respect of international applications filed on or after 1 April 2004. A request for the extension of a European patent to Croatia may be made if the designation of all PCT Contracting States under new PCT Rule 4.9(a) in the international application is not withdrawn with respect to Croatia under PCT Rule 90*bis*.2, and if the international filing fee is paid.

When, within 31 months (Chapter I or Chapter II) from the priority date, the applicant enters the regional phase before the European Patent Office and pays to the EPO the European extension fee for the extension of the European patent to Croatia, a request for the extension of the European patent is deemed to have been made (no special indication concerning the extension should be made in the PCT request). If, however, the 31-month time limit has been missed, the extension fee may still be validly paid, with a surcharge of 50%, within the grace period provided for in the EPC for payment of the designation fees. The request for extension will be considered withdrawn if, upon entry into the regional phase before the EPO, the European extension fee is not paid within the applicable time limit. No notification of non-observance of the basic time limit or expiry of the period of grace will be issued, and re-establishment of rights is not possible in respect of payment of the extension fee.

Upon completion of the European procedure, the EPO will inform the Croatian Intellectual Property Office of the grant of the European patent. That patent will have the effect of a national patent granted by the national patent office, provided that, within three months from the publication by the EPO of the mention of grant of the European patent, a translation of the claims into Croatian is filed with, and the prescribed fees are paid to, the Croatian Intellectual Property Office. Renewal fees for the extended European patent will have to be paid to the national patent office for the years following the year in which the mention of the grant of the European patent was published by the EPO.

The option of entering the national phase directly before the national patent office within 31 months from the priority date, instead of proceeding with a request for the extension of a European patent to Croatia, is also available for any international application provided that the designation of Croatia has not been withdrawn.

INFORMATIONS SUR LES ÉTATS CONTRACTANTS ET LES ORGANISATIONS INTERGOUVERNEMENTALES**EP Organisation européenne des brevets (OEB)****HR Croatie**

La Croatie a récemment conclu avec l'Organisation européenne des brevets (OEB) un accord relatif à l'extension des effets des demandes de brevet européen et des brevets européens à la Croatie. L'accord est entré en vigueur le 1^{er} avril 2004. Aux termes de cet accord, il est possible d'obtenir une protection par brevet en Croatie en demandant l'extension d'un brevet européen à la Croatie. La procédure d'extension est également possible par la voie PCT, pour autant que les conditions requises soient remplies.

Il convient de noter que la Croatie (code de pays HR) n'est pas partie à la Convention sur le brevet européen (CBE) et ne peut pas elle-même être désignée aux fins d'un brevet européen (EP).

L'extension d'un brevet européen à la Croatie par la voie PCT est possible en ce qui concerne les demandes internationales déposées le 1^{er} avril 2004 ou ultérieurement. Une demande d'extension des effets du brevet européen à la Croatie peut être faite si la désignation dans la demande internationale de tous les États contractants du PCT en vertu de la nouvelle règle 4.9.a) du PCT n'a pas été retirée en ce qui concerne la Croatie en vertu de la règle 90*bis*.2 et si la taxe internationale de dépôt a été acquittée.

Lorsque, dans un délai de 31 mois (chapitre I ou chapitre II) à compter de la date de priorité, le déposant engage la phase régionale auprès de l'Office européen des brevets et paie à l'OEB la taxe d'extension européenne pour l'extension des effets du brevet européen à la Croatie, une requête en extension des effets du brevet européen est réputée avoir été présentée (aucune indication particulière concernant l'extension ne doit être inscrite dans la requête selon le PCT). Toutefois, si le délai de 31 mois a été dépassé, la taxe d'extension peut encore être valablement acquittée, moyennant une surtaxe de 50%, dans le délai de grâce prévu dans la CBE pour le paiement des taxes de désignation. La requête en extension sera considérée comme retirée si, lors de l'ouverture de la phase régionale devant l'OEB, la taxe d'extension européenne n'est pas payée dans le délai applicable. Il ne sera pas envoyé de notification de non observation du délai de base ou d'expiration du délai de grâce, et le rétablissement des droits n'est pas possible en ce qui concerne le paiement de la taxe d'extension.

A l'achèvement de la procédure européenne, l'OEB informera l'Office croate de la propriété intellectuelle de la délivrance du brevet européen. Ce brevet aura l'effet d'un brevet national délivré par l'office national des brevets à condition que, dans les trois mois suivant la publication par l'OEB de la mention de la délivrance du brevet européen, une traduction des revendications en croate soit déposée auprès de l'Office croate de la propriété intellectuelle et que les taxes prescrites soient acquittées auprès de cet office. Des taxes de renouvellement du brevet européen étendu devront être payées à l'office national des brevets pour les années suivant celle où la mention de délivrance du brevet européen aura été publiée par l'OEB.

La possibilité d'engager la phase nationale directement auprès de l'office national des brevets dans un délai de 31 mois à compter de la date de priorité, en lieu et place du traitement d'une requête en extension des effets d'un brevet européen à la Croatie, est également possible pour toute demande internationale, à condition que la désignation de la Croatie n'aie pas été retirée.

EG Egypt – Corrigendum

The international filing fee, the fee per sheet in excess of 30 and the PCT-EASY reduction (under Schedule of Fees, item 3), were incorrectly indicated when publishing the requirements of the **Egyptian Patent Office** as receiving Office in Annex C(EG), in PCT Gazette No. 45/2004. The correct amounts of the fees should read as follows:

Fees payable to the receiving Office:	Currency: US dollar (USD)
Transmittal fee:	USD 100
International filing fee: ⁵	USD 1,134
Fee per sheet in excess of 30: ⁵	USD 12
Reductions (under Schedule of Fees, item 3):	
PCT-EASY: ⁶	USD 81
Search fee:	See Annex D(AT) or (EP)
Fee for priority document (PCT Rule 17.1(b)):	USD 30

[Updating of PCT Gazette No. S-05/2004(E), Annex C(EG), page 269]

³ This fee is payable to the International Searching Authority and only in particular circumstances.

⁴ This fee is payable to the International Preliminary Examining Authority and only in particular circumstances.

⁵ This fee is reduced by 75% if certain conditions apply (see corresponding footnote to Annex C(IB)). For further details, see *PCT Gazette* No. 44/2003, page 24736, Schedule of Fees, item 4. It is to be noted that, if both the PCT-EASY reduction and the 75% reduction of the international filing fee are applicable, the 75% reduction is calculated after the PCT-EASY reduction.

⁶ Where the request is filed in PCT-EASY format together with a PCT-EASY diskette and the receiving Office accepts such filings (see *PCT Gazette* No. 51/1998, pages 17330 and 17332, and No. 44/2003, page 24736, Schedule of Fees, item 3(a)), the total amount of the international filing fee is reduced.

EG Égypte – Rectificatif

Les indications concernant la taxe internationale de dépôt, la taxe par feuille à compter de la 31^e et la réduction PCT-EASY (selon le barème de taxes, point 3) étaient erronées lors de la publication des exigences de l'**Office égyptien des brevets** en tant qu'office récepteur dans l'annexe C(EG) de la Gazette du PCT n° 45/2004. Les montants corrects des taxes sont les suivants :

Taxes payables à l'office récepteur :	Monnaie : Dollar des États-Unis (USD)
Taxe de transmission :	USD 100
Taxe internationale de dépôt ⁵ :	USD 1.134
Taxe par feuille à compter de la 31 ^e ⁵ :	USD 12
Réductions (selon le barème de taxes, point 3) :	
PCT-EASY ⁶ :	USD 81
Taxe de recherche :	Voir l'annexe D(AT) ou (EP)
Taxe pour le document de priorité (règle 17.1.b) du PCT) :	USD 30

[Mise à jour de la Gazette du PCT n° S-05/2004(F), annexe C(EG), page 278]

³ Taxe à verser à l'administration chargée de la recherche internationale et dans certains cas seulement.

⁴ Taxe à verser à l'administration chargée de l'examen préliminaire international et dans certains cas seulement.

⁵ Cette taxe est réduite de 75% si certaines conditions s'appliquent (voir la note de bas de page correspondante de l'annexe C(IB)). Pour plus de précisions, voir la *Gazette du PCT* n° 44/2003, page 24737, barème de taxes, point 4. Il convient de noter que, si la réduction PCT-EASY et la réduction de 75% de la taxe internationale de dépôt s'appliquent toutes deux, la réduction de 75% est calculée après la réduction PCT-EASY.

⁶ Lorsque la requête est déposée en mode de présentation PCT-EASY avec une disquette PCT-EASY et que l'office récepteur accepte ce mode de dépôt (voir la *Gazette du PCT* n° 51/1998, pages 17331 et 17333, et n° 44/2003, page 24737, barème de taxes, point 3.a)), le montant total de la taxe internationale de dépôt est réduit.

The **United Kingdom Patent Office** has notified changes to the conditions of its national law under which a United Kingdom resident may file directly at the European Patent Office or at the International Bureau of WIPO (only the footnote related to the competent receiving Office for nationals and residents of the United Kingdom has been modified), and has also informed the International Bureau of a modification as to the time when the name and address of the inventor must be given if the United Kingdom is a designated or elected Office. The changes, applicable as from 1 January 2005, are as follows:

¹ At the time of writing, a United Kingdom resident may only file direct at the European Patent Office or at the International Bureau of WIPO: (i) after having obtained written authorization from the United Kingdom Patent Office; or (ii) after an application for a patent for the same invention has been filed at the United Kingdom Patent Office and not less than six weeks have elapsed without the Comptroller of the United Kingdom Patent Office giving a direction prohibiting publication or communication of the invention. However, under forthcoming changes to UK patent law, these restrictions will only apply to an application containing information which relates to military technology or which might be prejudicial to UK national security or the safety of the public. Where an application does not contain any such information, the above restrictions will no longer apply. Details of when these changes take effect can be obtained from the UK Patent Office: Security Section, Concept House, Cardiff Road, Newport, South Wales, NP10 8QQ. Tel: (44-1633) 81 35 58. Neither the current nor the new restrictions apply to an application for a patent for an invention for which an application for a patent has first been filed in a country outside the United Kingdom by a person resident outside the United Kingdom.

INFORMATION ON CONTRACTING STATES AND INTERGOVERNMENTAL ORGANIZATIONS**EP European Patent Organisation (EPO)****HR Croatia – Corrigendum**

The information concerning the agreement between Croatia and the European Patent Organisation (EPO) relating to the extension of the effects of European patent applications and patents to Croatia published in PCT Gazette No. 20/2004 on page 11144, contained an error. The text of the fifth paragraph, second sentence, should refer to a translation of the “specification” instead of a translation of the “claims”.

JP Japan

The **Japan Patent Office** has made modifications to the wording of the special provisions concerning earlier national applications from which priority is claimed, and the effects of such provisions, by removing references to “the priority date”, and replacing them with references to “the filing date of that earlier application”. The consolidated text should now read as follows:

Are there special provisions concerning earlier national applications from which priority is claimed and what are the effects of these provisions?

Articles 41 and 42 of the Japan Patent Law and Articles 8 and 9 of the Japan Utility Model Law provide that the filing of an international application which contains the designation of Japan and claims the priority of an earlier national application having effect in Japan shall have the result that the earlier national application will be considered withdrawn after the expiration of 15 months from the filing date of that earlier application. If the applicant of an international application which claims the priority of an earlier national application wants to avoid this effect, the designation of Japan will have to be withdrawn before the expiration of 15 months from the filing date of that earlier application, in order to avoid automatic withdrawal of the earlier-filed national application.

INFORMATIONS SUR LES ÉTATS CONTRACTANTS ET LES ORGANISATIONS INTERGOUVERNEMENTALES**EP Organisation européenne des brevets (OEB)****HR Croatie – rectificatif**

L'information concernant l'accord conclu entre la Croatie et l'Organisation européenne des brevets (OEB) relatif à l'extension des effets des demandes de brevet européen et des brevets européens à la Croatie, et publié dans la Gazette du PCT n° 20/2004 à la page 11145, contenait une erreur. Le texte de la deuxième phrase du cinquième paragraphe aurait dû se référer à une traduction du "fascicule" et non pas à une traduction des "revendications".

JP Japon

L'**Office des brevets du Japon** a modifié l'énoncé des dispositions particulières relatives à des demandes nationales antérieures dont la priorité est revendiquée, ainsi que des conséquences de ces dispositions, en supprimant les références à "la date de priorité" et en les remplaçant par des références à "la date de dépôt de cette demande antérieure". Le texte récapitulatif est maintenant le suivant :

Existe-t-il des dispositions particulières relatives à des demandes nationales antérieures dont la priorité est revendiquée et quelles sont les conséquences de ces dispositions ?

Les articles 41 et 42 de la loi du Japon sur les brevets et les articles 8 et 9 de la loi du Japon sur les modèles d'utilité prévoient que le dépôt d'une demande internationale qui contient la désignation du Japon et revendique la priorité d'une demande nationale antérieure produisant ses effets au Japon aura pour effet que la demande nationale antérieure sera considérée comme retirée après l'expiration d'un délai de 15 mois à compter de la date de dépôt de cette demande antérieure. Si le déposant d'une demande internationale qui revendique la priorité d'une demande nationale antérieure souhaite empêcher ce retrait, la désignation du Japon devra être retirée avant l'expiration d'un délai de 15 mois à compter de la date de dépôt de cette demande antérieure, afin d'éviter le retrait automatique de la demande nationale déposée antérieurement.

INFORMATION ON CONTRACTING STATES AND INTERGOVERNMENTAL ORGANIZATIONS**EP European Patent Organisation (EPO)****YU Serbia and Montenegro**

Serbia and Montenegro recently concluded an agreement with the European Patent Organisation (EPO) which provides for the extension of the effects of European patent applications and patents to Serbia and Montenegro. The agreement entered into force on 1 November 2004. Under the agreement, it is possible to obtain patent protection in Serbia and Montenegro by requesting the extension of a European patent to Serbia and Montenegro. The extension procedure is also available, if the necessary requirements are met, via the PCT.

Note that Serbia and Montenegro (country code YU) is not party to the European Patent Convention (EPC) and cannot be designated for a European patent (EP).

The extension of a European patent to Serbia and Montenegro via the PCT is available in respect of international applications filed on or after 1 November 2004. A request for the extension of a European patent to Serbia and Montenegro may be made if:

- (i) the designation of Serbia and Montenegro is not withdrawn; and
- (ii) the international filing fee is paid.

When, within 31 months (Chapter I or Chapter II) from the priority date, the applicant enters the regional phase before the European Patent Office and pays to the EPO the European extension fee for the extension of a European patent to Serbia and Montenegro, a request for the extension of a European patent is deemed to have been made (no special indication concerning the extension should be made in the PCT request). If, however, the 31-month time limit has been missed, the extension fee may still be validly paid, with a surcharge of 50%, within the period of grace provided for in the EPC for payment of the designation fees. The request for extension will be considered withdrawn if, upon entry into the regional phase before the EPO, the European extension fee is not paid within the applicable time limit. No notification of non-observance of the basic time limit or expiry of the period of grace will be issued, and re-establishment of rights is not possible in respect of payment of the extension fee.

A European patent application for which extension to Serbia and Montenegro has been requested is equivalent to a duly filed national application in Serbia and Montenegro and, after publication, confers provisional protection as from the date on which a translation of the claims into the national language (that is, Serbian) has been communicated by the applicant to the person using the invention in Serbia and Montenegro.

Upon completion of the European procedure, the EPO will inform the Intellectual Property Office (Serbia and Montenegro) of the grant of a European patent. That patent will have the effect of a national patent granted by the national patent office, provided that, within three months from publication of mention of the grant of a European patent in the *European Patent Bulletin*, a translation of the specification into Serbian is filed with, and the prescribed fees are paid to, the Intellectual Property Office (Serbia and Montenegro). Renewal fees for the extended European patent will have to be paid to the national patent office for the years following the year in which the mention of the grant of the European patent was published by the EPO.

The option of entering the national phase directly before the national patent office within 30 months from the priority date, instead of proceeding with a request for the extension of a European patent to Serbia and Montenegro, is also available for any international application provided that the designation of Serbia and Montenegro has not been withdrawn.

INFORMATIONS SUR LES ÉTATS CONTRACTANTS ET LES ORGANISATIONS INTERGOUVERNEMENTALES

EP Organisation européenne des brevets (OEB)

YU Serbie-et-Monténégro

La Serbie-et-Monténégro a récemment conclu avec l'Organisation européenne des brevets (OEB) un accord relatif à l'extension des effets des demandes de brevet européen et des brevets européens à la Serbie-et-Monténégro. L'accord est entré en vigueur le 1^{er} novembre 2004. Aux termes de cet accord, il est possible d'obtenir une protection par brevet en Serbie-et-Monténégro en demandant l'extension d'un brevet européen à la Serbie-et-Monténégro. La procédure d'extension est également possible par la voie PCT, pour autant que les conditions requises soient remplies.

Il convient de noter que la Serbie-et-Monténégro (code de pays YU) n'est pas partie à la Convention sur le brevet européen (CBE) et ne peut pas elle-même être désignée aux fins d'un brevet européen (EP).

L'extension d'un brevet européen à la Serbie-et-Monténégro par la voie PCT est possible en ce qui concerne les demandes internationales déposées le 1^{er} novembre 2004 ou ultérieurement. Une requête en extension des effets d'un brevet européen à la Serbie-et-Monténégro peut être présentée si :

- i) la désignation de la Serbie-et-Monténégro n'a pas été retirée; et
- ii) la taxe internationale de dépôt a été acquittée.

Lorsque, dans un délai de 31 mois (chapitre I ou chapitre II) à compter de la date de priorité, le déposant procède à l'ouverture de la phase régionale auprès de l'Office européen des brevets et paie à l'OEB la taxe d'extension européenne pour l'extension des effets d'un brevet européen à la Serbie-et-Monténégro, une requête en extension des effets d'un brevet européen est réputée avoir été présentée (aucune indication particulière concernant l'extension ne doit être inscrite dans la requête selon le PCT). Toutefois, si le délai de 31 mois a été dépassé, la taxe d'extension peut encore être valablement acquittée, moyennant une surtaxe de 50%, dans le délai supplémentaire prévu dans la CBE pour le paiement des taxes de désignation. La requête en extension sera considérée comme retirée si, lors de l'ouverture de la phase régionale devant l'OEB, la taxe d'extension européenne n'est pas payée dans le délai applicable. Il ne sera pas envoyé de notification de non-observation du délai de base ou d'expiration du délai supplémentaire, et le rétablissement des droits n'est pas possible en ce qui concerne le paiement de la taxe d'extension.

Une demande de brevet européen pour laquelle une requête en extension à la Serbie-et-Monténégro a été présentée équivaut à une demande nationale présentée en bonne et due forme en Serbie-et-Monténégro et, après publication, confère une protection provisoire à compter de la date à laquelle une traduction des revendications dans la langue nationale (à savoir, le serbe) a été communiquée par le déposant à la personne qui utilise l'invention en Serbie-et-Monténégro.

À l'issue de la procédure européenne, l'OEB informera l'Office de la propriété intellectuelle (Serbie-et-Monténégro) de la délivrance d'un brevet européen. Ce brevet aura l'effet d'un brevet national délivré par l'office national des brevets, à condition que, dans les trois mois suivant la publication de la mention de la délivrance d'un brevet européen dans le *Bulletin européen des brevets*, une traduction du fascicule en serbe soit déposée, et que les taxes prescrites soient acquittées, auprès de l'Office de la propriété intellectuelle (Serbie-et-Monténégro). Des taxes de renouvellement du brevet européen étendu devront être payées à l'office national des brevets pour les années suivant celle où la mention de la délivrance du brevet européen aura été publiée par l'OEB.

La possibilité d'engager la phase nationale directement auprès de l'office national des brevets dans un délai de 30 mois à compter de la date de priorité, en lieu et place du traitement d'une requête en extension des effets d'un brevet européen à la Serbie-et-Monténégro, est également possible pour toute demande internationale, à condition que la désignation de la Serbie-et-Monténégro n'ait pas été retirée.

The request for extension will be considered withdrawn if, upon entry into the regional phase before the EPO, the European extension fee is not paid within the applicable time limit. No notification of non-observance of the basic time limit or expiry of the period of grace will be issued, and re-establishment of rights is not possible in respect of payment of the extension fee.

A European patent application for which extension to Bosnia and Herzegovina has been requested is equivalent to a duly filed national application in Bosnia and Herzegovina and, after publication, confers provisional protection as from the date on which a translation of the claims into an official language of Bosnia and Herzegovina (that is, into Bosnian, Croatian or Serbian) has been communicated by the applicant to the person using the invention in Bosnia and Herzegovina.

Upon completion of the European procedure, the EPO will inform the Institute for Standards, Metrology and Intellectual Property of Bosnia and Herzegovina of the grant of a European patent. That patent will have the effect of a national patent granted by the national patent office, provided that, within three months from publication of mention of the grant of a European patent in the *European Patent Bulletin*, a translation of the specification into Bosnian, Croatian or Serbian is filed with, and the prescribed fees are paid to, the Institute for Standards, Metrology and Intellectual Property of Bosnia and Herzegovina. Renewal fees for the extended European patent will have to be paid to the national patent office for the years following the year in which the mention of the grant of the European patent was published by the EPO.

The option of entering the national phase directly before the national patent office within 34 months from the priority date, instead of proceeding with a request for the extension of a European patent to Bosnia and Herzegovina, is also available for any international application provided that the designation of Bosnia and Herzegovina has not been withdrawn.

INFORMATIONS SUR LES ÉTATS CONTRACTANTS ET LES ORGANISATIONS INTERGOUVERNEMENTALES (suite)

EP Organisation européenne des brevets (OEB)

BA Bosnie-Herzégovine

La Bosnie-Herzégovine a récemment conclu avec l'Organisation européenne des brevets (OEB) un accord relatif à l'extension des effets des demandes de brevet européen et des brevets européens à la Bosnie-Herzégovine. L'accord est entré en vigueur le 1^{er} décembre 2004. Aux termes de cet accord, il est possible d'obtenir une protection par brevet en Bosnie-Herzégovine en demandant l'extension d'un brevet européen à la Bosnie-Herzégovine. La procédure d'extension est également possible par la voie PCT, pour autant que les conditions requises soient remplies.

Il convient de noter que la Bosnie-Herzégovine (code de pays BA) n'est pas partie à la Convention sur le brevet européen (CBE) et ne peut pas elle-même être désignée aux fins d'un brevet européen (EP).

L'extension d'un brevet européen à la Bosnie-Herzégovine par la voie PCT est possible en ce qui concerne les demandes internationales déposées le 1^{er} décembre 2004 ou ultérieurement. Une requête en extension des effets d'un brevet européen à la Bosnie-Herzégovine peut être présentée si :

- i) la désignation de la Bosnie-Herzégovine n'a pas été retirée; et
- ii) la taxe internationale de dépôt a été acquittée.

Lorsque, dans un délai de 31 mois (chapitre I ou chapitre II) à compter de la date de priorité, le déposant procède à l'ouverture de la phase régionale auprès de l'Office européen des brevets et paie à l'OEB la taxe d'extension européenne pour l'extension des effets d'un brevet européen à la Bosnie-Herzégovine, une requête en extension des effets d'un brevet européen est réputée avoir été présentée (aucune indication particulière concernant l'extension ne doit être inscrite dans la requête selon le PCT). Toutefois, si le délai de 31 mois a été dépassé, la taxe d'extension peut encore être valablement acquittée, moyennant une surtaxe de 50%, dans le délai supplémentaire prévu dans la CBE pour le paiement des taxes de désignation. La requête en extension sera considérée comme retirée si, lors de l'ouverture de la phase régionale devant l'OEB, la taxe d'extension européenne n'est pas payée dans le délai applicable. Il ne sera pas envoyé de notification de non-observation du délai de base ou d'expiration du délai supplémentaire, et le rétablissement des droits n'est pas possible en ce qui concerne le paiement de la taxe d'extension.

Une demande de brevet européen pour laquelle une requête en extension à la Bosnie-Herzégovine a été présentée équivaut à une demande nationale présentée en bonne et due forme en Bosnie-Herzégovine et, après publication, confère une protection provisoire à compter de la date à laquelle une traduction des revendications dans une langue officielle de la Bosnie-Herzégovine (à savoir, le bosniaque, le croate ou le serbe) a été communiquée par le déposant à la personne qui utilise l'invention en Bosnie-Herzégovine.

À l'issue de la procédure européenne, l'OEB informera l'Institut des normes, de la métrologie et de la propriété intellectuelle de la Bosnie-Herzégovine de la délivrance d'un brevet européen. Ce brevet aura l'effet d'un brevet national délivré par l'office national des brevets à condition que, dans les trois mois suivant la publication de la mention de la délivrance d'un brevet européen dans le *Bulletin européen des brevets*, une traduction du fascicule en bosniaque, en croate ou en serbe soit déposée, et que les taxes prescrites soient acquittées, auprès de l'Institut des normes, de la métrologie et de la propriété intellectuelle de la Bosnie-Herzégovine. Des taxes de renouvellement du brevet européen étendu devront être payées à l'office national des brevets pour les années suivant celle où la mention de la délivrance du brevet européen aura été publiée par l'OEB.

La possibilité d'engager la phase nationale directement auprès de l'office national des brevets dans un délai de 34 mois à compter de la date de priorité, en lieu et place du traitement d'une requête en extension des effets d'un brevet européen à la Bosnie-Herzégovine, est également possible pour toute demande internationale, à condition que la désignation de la Bosnie-Herzégovine n'ait pas été retirée.
