The amendments to the PCT Regulations will enter into force on 1 July 2012 and consist in:

(iii) incorporating patent documents of the People's Republic of China into the PCT minimum documentation used in carrying out international searches (amendments to PCT Rule 34);³

(iv) adding a general provision for the excuse of delay in meeting certain PCT time limits due to "*force majeure*" circumstances beyond the control of the applicant (deletion of PCT Rule 82.2 and addition of new PCT Rule 82*quater*).⁴

The text of the amendments is reproduced below.

MEETINGS OF THE INTERNATIONAL PATENT COOPERATION UNION – ASSEMBLY (FORTY-THIRD (25TH EXTRAORDINARY) SESSION)

NOTE PREPARED BY THE INTERNATIONAL BUREAU

A number of amendments to the PCT Regulations, as well as the appointment of a new International Searching and Preliminary Examining Authority, were approved by the Assembly of the International Patent Cooperation Union (PCT Union) at its forty-third (25th extraordinary) session, which was held in Geneva from 1 to 9 October 2012 as part of the meetings of the Assemblies of the Member States of WIPO.

Documents which were prepared for the Assembly, and which give detailed background information relating to the decisions that were taken, as well as the report of the session, are available on the WIPO website at:

www.wipo.int/meetings/en/details.jsp?meeting_id=26257

The text of the Agreement will be published in the Official Notices (PCT Gazette) in due course.

Amendments to the PCT Regulations

The amendments to the PCT Regulations will enter into force on 1 January 2013 and will apply to any international application the international filing date of which is on or after that date. They are intended to simplify the procedures for applicants from all PCT Contracting States made possible by the enactment of the Leahy-Smith America Invents Act by the Government of the United States of America and concern:

Official Notices (PCT Gazette) is part of the Gazette published by the International Bureau of the World Intellectual Property Organization in accordance with Article 55(4) of the Patent Cooperation Treaty (PCT) and Rule 86 of the Regulations under the PCT.

MODIFICATIONS OF THE ADMINISTRATIVE INSTRUCTIONS UNDER THE PCT

NOTE PREPARED BY THE INTERNATIONAL BUREAU

Following consultation with interested Offices and Authorities pursuant to PCT Rule 89.2(b), modifications to Sections 715 and 716 of the Administrative Instructions under the PCT, as set out below, are promulgated with effect from 1 January 2010.

These modifications are intended to implement provisions of the PCT Regulations which permit the applicant to request that priority documents be obtained by receiving Offices and the International Bureau from digital libraries rather than having to be supplied directly by the applicant (PCT Rules 17.1(b-*bis*), 17.1(d), 66.7(a) and 91.1(e)).

All modifications will apply to international applications filed on or after 1 January 2010.

The consolidated text of the Administrative Instructions (PCT/AI/10) as in force from 1 January 2010 is available on the WIPO website at: www.wipo.int/pct/en/texts/pdf/ai.pdf.

TEXT OF THE MODIFICATIONS OF THE ADMINISTRATIVE INSTRUCTIONS

(as in force from 1 January 2010)

Section 715

Availability of Priority Documents from Digital Libraries

(a) For the purposes of Rules 17.1(b-*bis*), 17.1(d) (where appropriate, as applicable by virtue of Rules 17.1(c) and 82*ter*.1(b)), 66.7(a) (where appropriate, as applicable by virtue of Rule 43*bis*.1(b)) and 91.1(e), a priority document shall be considered to be available from a digital library to the receiving Office, the International Bureau, a designated Office, the International Searching Authority or the International Preliminary Examining Authority, as the case may be:

(i) if the Office or Authority concerned has notified the International Bureau, or the International Bureau has declared, as the case may be, that it is prepared to obtain priority documents from that digital library; and

(ii) the priority document concerned is held in that digital library and the applicant has, to the extent required by the procedures for accessing the relevant digital library, authorized the Office or Authority concerned or the International Bureau, as the case may be, to access that priority document.

(b) A notification to the International Bureau under paragraph 12 of the Framework Provisions for the Digital Access Service for Priority Documents by

(i) the International Bureau; or

(ii) an Office in its capacity as receiving Office, designated Office, International Searching Authority or International Preliminary Examining Authority,

that it is prepared to obtain priority documents via the Digital Access Service shall be taken as a declaration or notification under paragraph (a)(i) that the International Bureau or Office acting in the relevant capacity will obtain priority documents through the Digital Access Service from any digital library which has been the subject of a notification in accordance with paragraph 10 of the Framework Provisions, including libraries for which such a notification is subsequently made with effect prior to the date on which the Office or Bureau is requested to retrieve the priority document.

(c) An Office or Authority which has given a notification to the International Bureau under paragraph (a)(i) or (b) shall notify the International Bureau of any change in the information so notified.

(d) The International Bureau shall promptly publish in the Gazette any notification received by it under paragraph (a)(i) or (b) of this Section, any declaration made by it under paragraph (a)(i) or (b), and any change in the information so declared.

(e) The effective date of any change published under paragraph (d) shall be as specified by the Office or Authority concerned or by the International Bureau, as the case may be, provided that any change which restricts the ability of the applicant to request the Office, the Authority or the International Bureau to obtain a priority document from the digital library shall, except in the case where priority documents are no longer held in the digital library, not be effective earlier than two months after the date of publication of the change in the Gazette.

Section 716

Request that Priority Document Be Obtained from a Digital Library under Rule 17.1(b-bis)

(a) Any request under Rule 17.1(b-bis):

(i) shall identify the priority document concerned in accordance with Rule 4.10(a);

(ii) where the priority document is held in connection with another application which relied upon that priority document to support a priority claim and that digital library is to be accessed other than through the Digital Access Service for Priority Documents, and if so required by the receiving Office or the International Bureau, shall indicate the number of that other application; and

(iii) where applicable, shall be accompanied by the fee referred to in Rule 17.1(b-bis).

(b) Where the applicant, in accordance with Rule 17.1(b-bis) and paragraph (a) of this Section, requests the receiving Office or the International Bureau to obtain a priority document which, in accordance with Section 715(a), is considered to be available from a digital library to that Office or the International Bureau, but that Office or the International Bureau finds that the priority document is in fact not available to it, that Office or the International Bureau, as the case may be, shall notify the applicant, giving the opportunity to furnish the priority document to it, or to ensure that the document is made available to it from a digital library, within a time limit of not less than two months from the date of the notification or within the time limit specified in Rule 17.1(a), whichever time limit expires later. Where the priority document is furnished or becomes available to the Office or the International Bureau within that time limit, the requirements of Rule 17.1(b-bis) shall be considered to have been met. If the priority document is not so furnished or does not become available within that time limit, the request that the document be obtained from a digital library shall be considered not to have been made.

(c) Where the applicant requests the receiving Office or the International Bureau under Rule 17.1(b-*bis*) to obtain a priority document from a digital library but that request does not comply with the requirements of that Rule and paragraph (a) of this Section, or the priority document concerned is not considered to be available to that Office or the International Bureau in accordance with Section 715(a), that Office or the International Bureau, as the case may be, shall promptly inform the applicant accordingly.

WIPO DIGITAL ACCESS SERVICE FOR PRIORITY DOCUMENTS (DAS)

Using DAS with the PCT

With effect since 1 January 2010, and in accordance with Section 715(b)(i) of the Administrative Instructions under the PCT, the International Bureau is able to retrieve priority documents through the WIPO Digital Access Service for Priority Documents (DAS) for use with international applications filed under the PCT. A notification to this effect can be found on the WIPO website at: www.wipo.int/patentscope/en/pdocforum/participating.html.

This means that the applicant can request the International Bureau to retrieve a copy of an earlier application from DAS for use as a priority document instead of having to provide a certified copy, as long as:

(i) the document in question has been added to DAS by a participating “depositing Office” (see below); and

(ii) the applicant has indicated that the International Bureau should have access to that document, using the applicant portal at: https://webaccess.wipo.int/priority_documents/en/.

Background

The Offices (“depositing Offices”) which currently allow applicants to make applications available to DAS are: the Australian Patent Office, the International Bureau (for international applications filed with the International Bureau as receiving Office), the Japan Patent Office, the Korean Intellectual Property Office, the Spanish Patent and Trademark Office, the United Kingdom Intellectual Property Office (an operating name of the Patent Office) and the United States Patent and Trademark Office (USPTO).

Several more Offices are expected to join this system in the near future. Details of how to request any particular depositing Office to make a document available to DAS are available from the respective websites of those Offices.

The legal basis for recognition of priority documents retrieved by the International Bureau through DAS is PCT Rule 17.1(b-*bis*)(ii) in conjunction with Sections 715 and 716 of the Administrative Instructions.

The service under Rule 17.1(b) whereby the receiving Office will prepare a copy of a priority document which would be issued by it and send it directly to the International Bureau continues to apply and is not affected by the addition of this complementary service.

Using DAS for International Applications under the PCT

The International Bureau will recognize requests to obtain documents from DAS for any international application for which the 16-month time limit under Rule 17.1(b-*bis*) has not yet expired on 1 January 2010, provided that the applicant has taken all the necessary steps to ensure that the application has been made available to the International Bureau through the Service. Notably, as well as making sure that the document is available to DAS, the applicant needs to check the box in the applicant Web portal indicating that the International Bureau is permitted access to that document. Otherwise, the Bureau cannot retrieve the document.

The International Bureau does not charge any fee for this service, though the depositing Office may charge a fee for making the priority document available to the system in the first place.

Making the Request

A request for the International Bureau to obtain a priority document from DAS can be made in the following ways:

Paper applications

Tick the relevant box(es) in item 6 of the request form PCT/RO/101, as in force since 1 January 2010, available from: www.wipo.int/pct/en/forms/request/ed_request_2010.pdf.

Electronic applications and PCT-EASY filings

Pending the implementation of equivalent check-boxes in PCT-SAFE, include a letter to the International Bureau, clearly requesting that some or all of the priority documents be retrieved using DAS. The content of the letter should preferably be as follows, with no other matters dealt with in the letter:

“The International Bureau is requested to retrieve the priority documents for this international application using the WIPO Digital Access Service for Priority Documents.”

If only certain of the documents are available through this system, the letter should specify which priority documents are to be retrieved that way and that the other documents will either be forwarded by the receiving Office or else provided as certified copies in the conventional way.

Such a letter can be included in an application prepared using PCT-SAFE as follows:

- (i) In the “Contents” tab, select “Accompanying Items”.
- (ii) Select “Other” from the drop-down list of item types and type “p-doc retrieval” into the box to describe the item.
- (iii)(a) If filing a fully electronic application using PCT-SAFE, double-click on the item which appears in the Content Details list to open a dialog box allowing the file containing the letter to be attached (this should preferably be in PDF format where this is accepted by the relevant receiving Office or JPEG or TIFF otherwise).
- (b) If filing a PCT-EASY or PCT EASY/EFS Web application, double-click on the item and indicate that the document is enclosed.

International applications which have already been filed

Send a letter, which must reach the International Bureau prior to 16 months from the priority date, quoting the international application number and clearly requesting that some or all of the priority documents be retrieved using DAS. The content of the letter should preferably be as follows and be clearly marked as a separate section if any other issues are dealt with.

“The International Bureau is requested to retrieve [the priority documents] [the following priority documents] for international application PCT/XXyyyy/nnnnnn using the WIPO Digital Access Service for Priority Documents.”

Help

Support is available from the PCT-SAFE Help Desk (pctsafe.help@wipo.int), which acts as focal point for DAS related issues as well as for PCT-SAFE.

**MODIFIED DIRECTIVES OF THE ASSEMBLY RELATING TO
THE ESTABLISHMENT OF EQUIVALENT AMOUNTS OF CERTAIN FEES**
(to enter into force on 1 July 2010)

The Assembly establishes in the following terms the directives relating to the establishment of equivalent amounts of the international filing fee, the handling fee, the search fee and the supplementary search fee (see Rules 15.2(d)(i), 16.1(d)(i), 45*bis*.3(b) and 57.2(d)(i)), it being understood that, in the light of experience, the Assembly may at any time modify these directives:

Establishment of Equivalent Amounts

(1) The equivalent amounts of the international filing fee and the handling fee in any currency other than Swiss franc, and of the search fee and the supplementary search fee in any currency other than the fixed currency, shall be established by the Director General, in the case of:

- (i) the international filing fee, after consultation with each receiving Office which prescribes payment of that fee in such currency;
- (ii) the search fee, after consultation with each receiving Office which prescribes payment of that fee in such currency;
- (iii) the handling fee, after consultation with each International Preliminary Examining Authority which prescribes payment of that fee in such currency.

In the case of the international filing fee, the search fee and the handling fee, the equivalent amounts shall be established according to the exchange rates prevailing on the day preceding the day on which the consultations are initiated by the Director General. In the case of the supplementary search fee, the equivalent amounts shall be established according to the exchange rates prevailing on the day on which the Director General receives the notification of the amount of the supplementary search fee or prevailing on the day two months prior to the entry into force of the supplementary search fee, whichever is the later.

- (2) The amounts so established shall be the equivalent, in round figures,
- (i) of the amount of the international filing fee and of the handling fee, respectively, in Swiss franc set out in the Schedule of Fees;
 - (ii) of the amount of the search fee and the supplementary search fee (if applicable) established by the International Searching Authority in the fixed currency.

They shall be notified by the International Bureau to each receiving Office, International Searching Authority and International Preliminary Examining Authority, as applicable, prescribing payment or establishing fees in the currency concerned and shall be published in the Gazette.

Establishment of New Equivalent Amounts Consequential on Changes in the Amount of the Fee Concerned

(3) Paragraphs (1) and (2) shall apply *mutatis mutandis* where the amount of the international filing fee, the handling fee, the search fee or the supplementary search fee is changed. The new equivalent amounts in the prescribed currencies shall be applied from the same date as the changed amount of the international filing fee or of the handling fee set out in the amended Schedule of Fees, or from the same date as the changed amount of the search fee or the supplementary search fee in the fixed currency.

Establishment of New Equivalent Amounts Consequential on Changes in Exchange Rates

(4) In the month of October of each year, the Director General shall, where applicable, after consultations with the Offices or Authorities referred to in paragraph (1), establish new equivalent amounts of the international filing fee, the handling fee, the search fee and the supplementary search fee according to the exchange rates prevailing on the first Monday in the

month of October. Unless otherwise decided by the Director General, any adjustment under this paragraph shall enter into force on the first day of the subsequent calendar year.

(5) Where, for more than four consecutive Fridays (midday, Geneva time), the exchange rate between Swiss franc (in the case of the international filing fee and the handling fee) or the fixed currency (in the case of the search fee and the supplementary search fee) and any applicable prescribed currency is by at least 5% higher, or by at least 5% lower, than the last exchange rate applied, the Director General shall, where applicable, after consultations with the Offices or Authorities referred to in paragraph (1), establish new equivalent amounts of the international filing fee, the search fee, the supplementary search fee and/or the handling fee, as applicable, according to the exchange rate prevailing on the first Monday following the expiration of the period referred to in the first sentence of this paragraph. The newly established amount shall become applicable two months after the date of its publication in the Gazette, provided that the receiving Offices or the International Preliminary Examining Authorities concerned, as applicable, and the Director General may agree on a date falling during the said two-month period, in which case the said amount shall become applicable from that date.

INFORMATION ON CONTRACTING STATES AND INTERGOVERNMENTAL ORGANIZATIONS

ME Montenegro

EP European Patent Organisation

Montenegro has concluded, on 13 February 2009, an agreement with the European Patent Organisation which provides for the extension of the effects of European patent applications and patents to Montenegro. The agreement enters into force on 1 March 2010. Under the agreement, it is possible to obtain patent protection in Montenegro by requesting the extension of a European patent to Montenegro. The extension procedure is also available, if the necessary requirements are met, via the PCT.

Montenegro (country code: ME) is not party to the European Patent Convention (EPC) and cannot be designated for a European patent (EP).

The extension of a European patent to Montenegro via the PCT is available in respect of international applications filed on or after 1 March 2010. A request for the extension of a European patent to Montenegro may be made if the designation of all PCT Contracting States under PCT Rule 4.9(a) in the international application is not withdrawn with respect to Montenegro under PCT Rule 90*bis*.2, and if the international filing fee is paid.

When, within 31 months (Chapter I or Chapter II of the PCT Regulations) from the priority date, the applicant enters the regional phase before the European Patent Office (EPO) and pays to the EPO the European extension fee for the extension of the European patent to Montenegro, a request for the extension of the European patent is deemed to have been made (no special indication concerning the extension should be made in the PCT request). If, however, the 31-month time limit has been missed, the extension fee may still be validly paid, with a surcharge of 50%, within a grace period of two months. The request for extension will be considered withdrawn if, upon entry into the regional phase before the EPO, the European extension fee is not paid within the applicable time limit.

The extension procedure is not available for international applications filed prior to 1 March 2010, or for any European patents resulting from such applications. For these older applications and patents, comparable effects may however be available under the cooperation and extension agreement between the former Federal Republic of Yugoslavia and the EPO which entered into force on 1 November 2004.

Further information about the extension of European patent applications and patents to Montenegro will be published in the EPO brochure “National law relating to the EPC” as soon as it is available.

DEPOSITS OF MICROORGANISMS AND OTHER BIOLOGICAL MATERIAL: REQUIREMENTS OF DESIGNATED AND ELECTED OFFICES

EP European Patent Organisation

The **European Patent Office (EPO)** has notified changes in its requirements concerning the deposit of microorganisms and other biological material. The consolidated table of requirements reads as follows:

<p>Time (if any) earlier than 16 months from priority date by which applicant must furnish:</p>		<p>Additional indications (if any) which must be given besides those prescribed in Rule 13bis.3(a)(i) to (iii) pursuant to notifications from the Offices concerned</p>
<p>the indications prescribed in Rule 13bis.3(a)(i) to (iii)</p>	<p>any additional matter specified in the adjacent right-hand column</p>	
<p>None</p>	<p>At the time of filing</p>	<p>To the extent available to the applicant, relevant information on the characteristics of the biological material</p>

Deposits with CNCM can be made under the Budapest Treaty or, as far as the deposits of cell cultures, mycoplasma and rickettsiae are concerned, under a bilateral agreement with the EPO.

If the applicant wishes that, until the publication of the mention of the grant of a European patent or for 20 years from the date of filing if the application is refused or withdrawn or deemed to be withdrawn, the biological material shall be made available as provided in Rule 33(1) of the European Patent Convention (EPC) only by the issue of a sample to an expert nominated by the requester (EPC Rule 32(1)), the applicant must, by a written statement, inform the International Bureau accordingly before completion of technical preparations for publication of the international application. Such a statement must be separate from the description and the claims of the international application and must preferably be made on Form PCT/RO/134, referred to in Section 209 of the Administrative Instructions under the PCT and available on the WIPO website at: www.wipo.int/pct/en/forms/ro/editable/ed_ro134.pdf.

WARNING: Where the invention involves the use of or concerns biological material which is not available to the public at the date of filing the application and which has been deposited by a person other than the applicant, the reference to such a deposit must include the name and address of the depositor and a statement that the latter has authorized the applicant to refer to the deposited biological material in the application and has given his unreserved and irrevocable consent to the deposited material being made available to the public in accordance with EPC Rule 31(1)(d). Applicants are reminded that these indications (the name and address of the depositor, and the statement) must be furnished to the International Bureau within the applicable time limit under PCT Rule 13bis.4, that is, within 16 months from the priority date of the international application (this period is deemed to have been met if these indications are furnished before the technical preparations for international publication have been completed) or, if the applicant makes a request for early publication under PCT Article 21(2)(b), up to the date on which such a request is made. The failure to meet this time limit cannot be remedied upon entry into the European phase neither by re-establishment of rights nor by further processing. As a result, the application may have to be refused under EPC Article 97(2) in the course of examination proceedings for insufficient disclosure (EPC Article 83).

DEPOSITS OF MICROORGANISMS AND OTHER BIOLOGICAL MATERIAL: REQUIREMENTS OF DESIGNATED AND ELECTED OFFICES

EP European Patent Organisation

The **European Patent Office (EPO)** has notified changes in its requirements concerning the deposit of microorganisms and other biological material. The consolidated table of requirements reads as follows:

Time (if any) earlier than 16 months from priority date by which applicant must furnish:		Additional indications (if any) which must be given besides those prescribed in Rule 13bis.3(a)(i) to (iii) pursuant to notifications from the Offices concerned
the indications prescribed in Rule 13bis.3(a)(i) to (iii)	any additional matter specified in the adjacent right-hand column	
None	At the time of filing	To the extent available to the applicant, relevant information on the characteristics of the biological material

Deposits with CNCM can be made under the Budapest Treaty or, as far as the deposits of cell cultures, mycoplasma and rickettsiae are concerned, under a bilateral agreement with the EPO.

If the applicant wishes that, until the publication of the mention of the grant of a European patent or for 20 years from the date of filing if the application is refused or withdrawn or deemed to be withdrawn, the biological material shall be made available as provided in Rule 33(1) of the European Patent Convention (EPC) only by the issue of a sample to an expert nominated by the requester (EPC Rule 32(1)), the applicant must, by a written statement, inform the International Bureau accordingly before completion of technical preparations for publication of the international application where such publication takes place in one of the EPO official languages, i.e., English, French or German. Such a statement must be separate from the description and the claims of the international application and must preferably be made on Form PCT/RO/134, referred to in Section 209 of the Administrative Instructions under the PCT and available on the WIPO website at: www.wipo.int/pct/en/forms/ro/editable/ed_ro134.pdf.

deposited material being made available to the public in accordance with EPC Rule 31(1)(d). Applicants are reminded that these indications (the name and address of the depositor, and the statement) must be furnished to the International Bureau within the applicable time limit under PCT Rule 13*bis*.4, that is, within 16 months from the priority date of the international application (this period is deemed to have been met if these indications are furnished before the technical preparations for international publication have been completed) or, if the applicant makes a request for early publication under PCT Article 21(2)(b), up to the date on which such a request is made. The failure to meet this time limit cannot be remedied upon entry into the European phase neither by re-establishment of rights nor by further processing. As a result, the application may have to be refused under EPC Article 97(2) in the course of examination proceedings for insufficient disclosure (EPC Article 83).

DEPOSITS OF MICROORGANISMS AND OTHER BIOLOGICAL MATERIAL: REQUIREMENTS OF DESIGNATED AND ELECTED OFFICES

EP European Patent Organisation

Pursuant to PCT Rule 13*bis*.7(a)(i), the **European Patent Office (EPO)** has notified the International Bureau of the following notification, which will replace the notification published in PCT Gazette No. 49/1996, page 21263, with effect from 1 January 2011:

“In accordance with PCT Rule 13*bis*.3(a)(iv), where an invention involves the use of or concerns biological material which is not available to the public at the time of filing the international application, the following additional matter should be indicated by any applicant willing to enter the regional phase before the EPO as designated or elected Office:

1. to the extent available to the applicant, relevant information on the characteristics of the biological material should be mentioned (see EPC Rule 31(1)(b)); and

2. where the biological material has been deposited by a person other than the applicant with a recognized depository institution (see EPC Rule 31(1)(d)),

(a) the name and the address of the depositor should be stated in the application, and

(b) a statement that the depositor has authorised the applicant to refer to the deposited biological material in the application and has given his unreserved and irrevocable consent to the deposited material being made available to the public in accordance with EPC Rule 33 should be included in the submission.

These indications must be submitted within the applicable time limit under PCT Rule 13*bis*.4 (that is, generally, within 16 months from the priority date). Upon entry into the European phase, that time limit will usually already have expired while the failure to meet this time limit cannot be remedied neither by re-establishment of rights nor by further processing. As a result, the application may have to be refused under EPC Article 97(2) in the course of the examination proceedings for insufficient disclosure under EPC Article 83.

The requirement under item 2 applies when the depositor is not applicant for the EPO, for instance where the depositor is applicant-inventor for the United States of America only.

It follows that applicants are strongly recommended to file of their own motion a completed Form PCT/RO/134 as well as the deposit receipt with the International Bureau before expiry of the applicable time limit. Where the deposit was made by a person other than the applicant, this should be indicated under point C of Form PCT/RO/134 and a ‘statement of authorisation and consent’ should be filed in addition within the applicable time limit.

For any further details, reference is made to the Notice from the EPO dated 7 July 2010 concerning inventions which involve the use of or concern biological material (OJ EPO 10/2010, 498) and to the EPO Chapter in the *PCT Applicant's Guide* – International Phase – Annex L.”

DEPOSITS OF MICROORGANISMS AND OTHER BIOLOGICAL MATERIAL: REQUIREMENTS OF DESIGNATED AND ELECTED OFFICES

EP European Patent Organisation

The **European Patent Office (EPO)** has notified changes in its requirements concerning the deposit of microorganisms and other biological material. The consolidated table of requirements reads as follows:

Time (if any) earlier than 16 months from priority date by which applicant must furnish:		Additional indications (if any) which must be given besides those prescribed in Rule 13bis.3(a)(i) to (iii) pursuant to notifications from the Offices concerned
the indications prescribed in Rule 13bis.3(a)(i) to (iii)	any additional matter specified in the adjacent right-hand column	
None	At the time of filing	To the extent available to the applicant, relevant information on the characteristics of the biological material

Deposits with CNCM can be made under the Budapest Treaty or, as far as the deposits of cell cultures, mycoplasma and rickettsiae are concerned, under a bilateral agreement with the EPO.

If the applicant wishes that, until the publication of the mention of the grant of a European patent or for 20 years from the date of filing if the application is refused or withdrawn or deemed to be withdrawn, the biological material shall be made available as provided in Rule 33(1) of the European Patent Convention (EPC) only by the issue of a sample to an expert nominated by the requester (EPC Rule 32(1)), the applicant must, by a written statement, inform the International Bureau accordingly before completion of technical preparations for publication of the international application where such publication takes place in one of the EPO official languages, i.e., English, French or German. Such a statement must be separate from the description and the claims of the international application and must preferably be made on Form PCT/RO/134, referred to in Section 209 of the Administrative Instructions under the PCT and available on the WIPO website at: www.wipo.int/pct/en/forms/ro/editable/ed_ro134.pdf.

WARNING: Where the invention involves the use of or concerns biological material which is not available to the public at the date of filing the application and which has been deposited by a person other than the applicant, the reference to such a deposit must include the name and address of the depositor and a statement that the latter has authorized the applicant to refer to the deposited biological material in the application and has given his unreserved and irrevocable consent to the deposited material being made available to the public in accordance with EPC Rule 31(1)(d). If any of these indications (the name and address of the depositor, and the statement) is not included in a reference to deposited biological material in the international application as filed, it may still be furnished to the International Bureau within a period of 16 months after the date of filing of the international patent application or, if priority is claimed, after the priority date; this time limit is deemed to have been met if the indication reaches the International Bureau before the technical preparations for international publication have been completed (PCT Rule 13bis.4(a)). Where the applicant makes a request for early publication under PCT Article 21(2)(b), the indications must be furnished to the International Bureau at the latest before the completion of the technical preparations

for international publication (PCT Rule 13*bis*.4(c)). The failure to meet this time limit cannot be remedied upon entry into the European phase neither by re-establishment of rights nor by further processing. DIGITAL LIBRARIES

IB International Bureau

WIPO's Patentscope® Priority Document Access Service began practical operations on 1 April 2009 in accordance with the Framework Provisions for the Digital Access Service for Priority Documents, established on 31 March 2009 and posted on the WIPO website at <http://www.wipo.int/patentscope/en/pdocforum/>.

On 31 March 2009, the International Bureau notified, in accordance with paragraph 10 of the Framework Provisions, that documents comprising international applications filed at the receiving Office of the International Bureau would be made available from the International Bureau's digital library through the Service, with effect from 1 April 2009.

The effect of this is that any applicant who has filed an international application at the receiving Office of the International Bureau may request the International Bureau to make that application available through the Service for use as a priority document in any other Offices which have notified the International Bureau in accordance with paragraph 12 of the Framework Provisions that they will act as an accessing Office under the System (presently, the Japan Patent Office, and as of April 20, 2009, the United States Patent and Trademark Office (USPTO)). This is permitted for international applications filed before 1 April 2009 as well as international applications filed after that date. For the present, the applicant should make such a request in the form of a letter to the International Bureau, which may be submitted together with an international application filed with the receiving Office of the International Bureau or at a later stage.

It should be noted that, at present, the PCT does not recognize priority documents from other Offices which are made available through the Service. It is expected that this will be permitted in the near future, following appropriate modifications to the PCT Administrative Instructions, which will be advertised in this Gazette.

(a) In effecting the sequential numbering of the sheets of the international application in accordance with Rule 11.7, the elements of the international application shall be placed in the following order:

- (i) the request;
- (ii) the description (if applicable, including the sequence listing free text referred to in Rule 5.2(b) but excluding the sequence listing part of the description referred to in item (vi) of this paragraph);
- (iii) the claims;
- (iv) the abstract;
- (v) if applicable, the drawings;
- (vi) if applicable, the sequence listing part of the description.

(b) The sequential numbering of the sheets shall be effected by using the following separate series of numbering:

- (i) the first series applying to the request only and commencing with the first sheet of the request;
- (ii) the second series commencing with the first sheet of the description (as referred to in paragraph (a)(ii)) and continuing through the claims until the last sheet of the abstract;
- (iii) if applicable, a further series applying to the sheets of the drawings only and commencing with the first sheet of the drawings; the number of each sheet of the drawings shall consist of two Arabic numerals separated by a slant, the first being the sheet number and the second being the total number of sheets of drawings (for example, 1/3, 2/3, 3/3);
- (iv) if applicable, a further series applying to the sequence listing part of the description, commencing with the first sheet of that part.

Section 208

Sequence Listings

Any sequence listing, whether on paper or in electronic form, whether forming part of the international application or not forming part of the international application, shall comply with Annex C.

Section 513

Sequence Listings

(a) [No change]

(b) Where the international search report and the written opinion of the International Searching Authority are based on a sequence listing not forming part of the international application but furnished for the purposes of the international search, the international search report and the written opinion of the International Searching Authority shall so indicate.

(c) [No change]

(d) The International Searching Authority shall indelibly mark, on the first sheet of any sequence listing on paper which does not form part of the international application but was furnished for the purposes of the international search, the words “SEQUENCE LISTING NOT FORMING PART OF THE INTERNATIONAL APPLICATION” or their equivalent in the language of publication of the international application. Where such sequence listing is furnished in electronic form on a physical medium, that Authority shall physically label that medium accordingly.

(e) The International Searching Authority shall:

(i) keep in its files one copy of any sequence listing, whether on paper or in electronic form, which does not form part of the international application but was furnished for the purposes of the international search; and

(ii) where the sequence listing which does not form part of the international application but was furnished for the purposes of the international search is in electronic form, transmit one copy thereof to the International Bureau together with the copy of the international search report. If that listing in electronic form is filed on a physical medium in less than the number of copies required by the International Searching Authority, that Authority shall be responsible for the preparation of the additional copy and shall have the right to fix a fee for performing that task and to collect such fee from the applicant.

(f) Any International Searching Authority which requires, for the purposes of the international search, the furnishing of a sequence listing in electronic form shall notify the International Bureau accordingly. In that notification, the Authority shall specify the means of transmittal of the sequence listing in electronic form accepted by it in accordance with Annex F. The International Bureau shall promptly publish details of the notification in the Gazette.

Section 610

Sequence Listings

(a) Where the written opinion of the International Preliminary Examining Authority or the international preliminary examination report is based on a sequence listing not forming part of the international application but furnished for the purposes of the international preliminary examination, the written opinion and the international preliminary examination report of the International Preliminary Examining Authority shall so indicate.

(b) Where a meaningful written opinion of the International Preliminary Examining Authority cannot be established, or a meaningful international preliminary examination cannot be carried out, as to whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious) and to be industrially applicable, because a sequence listing is not available to the International Preliminary Examining Authority in the required form, that Authority shall so state in the written opinion and in the international preliminary examination report.

(c) The International Preliminary Examining Authority shall indelibly mark, on the first sheet of any sequence listing on paper which does not form part of the international application but was furnished for the purposes of the international preliminary examination, the words “SEQUENCE LISTING NOT FORMING PART OF THE INTERNATIONAL APPLICATION” or their equivalent in the language of publication of the international application. Where such sequence listing is furnished in electronic form on a physical medium, that Authority shall physically label that medium accordingly.

(d) The International Preliminary Examining Authority shall keep in its files one copy of any sequence listing, whether on paper or in electronic form, which does not form part of the international application but was furnished for the purposes of the international preliminary examination.

(e) Any International Preliminary Examining Authority which requires, for the purposes of the international preliminary examination, the furnishing of a sequence listing in electronic form shall notify the International Bureau accordingly. In that notification, the Authority shall specify the means of transmittal of the sequence listing in electronic form accepted by it in accordance with Annex F. The International Bureau shall promptly publish details of the notification in the Gazette.

(f) Where the national Office or intergovernmental organization that acted as the International Searching Authority also acts as the International Preliminary Examining Authority, any sequence listing not forming part of the international application but furnished to that Office or organization for the purposes of the international search shall be considered to have been furnished to it also for the purposes of the international preliminary examination.

SEQUENCE LISTINGS

Sequence Listing Forming Part of the International Application

3. A sequence listing which is contained in the international application as filed:

(i) shall be presented as a separate part of the description, be placed at the end of the application, preferably be entitled “Sequence Listing”, begin on a new page and have independent page numbering¹; preferably, the sequence listing shall not be reproduced in any other part of the application; subject to paragraph 36, it is unnecessary to describe the sequences elsewhere in the description;

(ii) shall present the sequences represented in the sequence listing and other available information in the sequence listing in accordance with paragraphs 5 to 35;

(iii) if contained in an international application filed in electronic form, shall be in an electronic document format and filed by a means of transmittal in accordance with paragraph 37.

3bis. Any correction under Rule 26, rectification under Rule 91 or amendment under Article 34(2)(b) of the description submitted in relation to sequences contained in an international application filed in electronic form shall be submitted in the form of a sequence listing in electronic form comprising the entire listing with the relevant correction, rectification or amendment. Any such sequence listing:

(i) shall preferably be entitled “Sequence Listing – Correction”, “Sequence Listing – Rectification” or “Sequence Listing – Amendment”, as the case may be, and have independent page numbering¹;

(ii) shall present the sequences represented in the sequence listing and other available information in the sequence listing in accordance with paragraphs 5 to 35; where applicable, the original numbering of the sequences in the international application as filed (as referred to in paragraph 5) shall be maintained; otherwise, the sequences shall be numbered in accordance with paragraph 5;

(iii) shall be in an electronic document format and filed by a means of transmittal in accordance with paragraph 38.

Sequence Listing Not Forming Part of the International Application

4. A sequence listing furnished under Rule 13*ter* for the purposes of the international search or international preliminary examination:

(i) shall preferably be entitled “Sequence Listing – Rule 13*ter*”;

(ii) shall present the sequences represented in the sequence listing and other available information in the sequence listing in accordance with paragraphs 5 to 35; where applicable, the original numbering of the sequences in the international application as filed (as referred to in paragraph 5) shall be maintained; otherwise, the sequences shall be numbered in accordance with paragraph 5;

(iii) if furnished on paper in accordance with Rule 13*ter*.1(b), shall have independent page numbering;

(iv) if furnished in electronic form, shall be in an electronic document format and filed by a means of transmittal in accordance with paragraph 39;

¹ *Editor’s Note:* No independent page numbering is required where the sequence listing is contained in an international application filed in electronic form and is in the electronic document format referred to in paragraph 40.

(v) if furnished in electronic form together with the international application, shall be identical to the sequence listing as contained in the application and be accompanied by a statement that “the information recorded in electronic form furnished under Rule 13*ter* is identical to the sequence listing as contained in the international application”;

(vi) if furnished subsequently to the filing of the international application, shall not go beyond the disclosure in the international application as filed and be accompanied by a statement to that effect; any such sequence listing shall contain only those sequences that were disclosed in the international application as filed.

4bis. Any correction under Rule 26, rectification under Rule 91 or amendment under Article 34(2)(b) of the description submitted in relation to sequences contained in the international application as filed shall be accompanied, for the purposes of the international search or international preliminary examination, by a sequence listing in electronic form in an electronic document format in accordance with paragraph 39, comprising the entire listing including any such correction, rectification or amendment, whenever this is required by the competent authority, unless such listing in electronic form is already available to that authority in a form and manner acceptable to it. Any such sequence listing in electronic form:

- (i) shall preferably be entitled “Sequence Listing – Correction – Rule 13*ter*”, “Sequence Listing – Rectification – Rule 13*ter*” or “Sequence Listing – Amendment – Rule 13*ter*”, as the case may be;

SEQUENCE LISTINGS IN ELECTRONIC FORM

37. Any sequence listing referred to in paragraph 3 contained in an international application filed in electronic form shall be in an electronic document format and be filed by a means of transmittal that has been specified by the receiving Office for the purposes of filing of international applications in electronic form, provided that any such sequence listing shall preferably be in the electronic document format specified in paragraph 40 and be filed, if possible, by a means of transmittal which has been specified by both the receiving Office and the competent authority.^{2,3}

² *Editor’s Note:* Where a sequence listing in electronic form complying with this Standard is not available to the competent authority in a form and manner acceptable to it (that is, in particular, where it is not available to it in the electronic document format specified in paragraph 40), the competent authority may invite the applicant to furnish to it such a sequence listing in electronic form (see Rule 13*ter*).

³ *Editor’s Note:* Irrespective of the electronic document format of the sequence listing, the spatial relationship (e.g., columns and rows) of the data elements included in the sequence listing and the format of the actual nucleotide and/or amino acid sequences, as specified in this Annex, shall be maintained.

38. Any sequence listing in electronic form referred to in paragraph 3*bis* shall be in an electronic document format that has been specified by the receiving Office (in the case of a correction) or by the competent authority (in the case of a rectification or an amendment) for the purposes of filing of international applications in electronic form, provided that any such listing shall preferably be in the electronic document format specified in paragraph 40. Any such listing shall be filed by a means of transmittal which has been specified by the receiving Office or the competent authority, as applicable, for the purposes of this paragraph; if possible, it shall preferably be filed by a means of transmittal which has been specified by both the receiving Office and the competent authority.⁴

39. Any sequence listing in electronic form referred to in paragraphs 4 and 4*bis* furnished for the purposes of the international search or international preliminary examination shall be in the electronic document format specified in paragraph 40 and be filed by a means of transmittal which has been specified by the competent authority for the purposes of this paragraph.

40. For the purposes of the international search and international preliminary examination, any sequence listing in electronic form shall be contained within one electronic file encoded as a text file using IBM⁵ Code Page 437, IBM Code Page 932⁶ or a compatible code page to represent the sequence listing as set out in paragraphs 5 to 36 with no other codes included. A compatible code page, as would be required for, for example, Japanese, Chinese, Cyrillic, Arabic, Greek or Hebrew characters, is one that assigns the Roman alphabet and numerals to the same hexadecimal positions as do the specified code pages.

41. Any sequence listing in the electronic document format specified in paragraph 40 shall preferably be created by dedicated software such as PatentIn.

PROCEDURE BEFORE DESIGNATED AND ELECTED OFFICES

42. For the purposes of the procedure before a designated or elected Office before which the processing of an international application which contains the disclosure of one or more nucleotide and/or amino acid sequences has started (see Rule 13*ter*.3):

(i) any reference to the receiving Office or the competent authority shall be construed as a reference to the designated or elected Office concerned;

⁴ *Editor's Note:* Where a replacement sequence listing in electronic form including any correction, rectification or amendment is not available to the competent authority in a form and manner acceptable to it (that is, in particular, where it is not available to it in the electronic document format specified in paragraph 40), any such correction, rectification or amendment need only be taken into account by that authority for the purposes of the international search or preliminary examination to the extent that a meaningful search or preliminary examination can be carried out without the replacement sequence listing (see paragraph 4*bis*, above). See also Editor's Note 3, which equally applies to any replacement sequence listing in electronic form referred to in paragraph 3*bis*.

⁵ [No change] *Editor's Note:* IBM is a registered trademark of International Business Machine Corporation, United States of America.

⁶ [No change] *Editor's Note:* The specified code pages are *de facto* standards for personal computers.

(ii) any reference to a sequence listing which is included in the international application by way of a correction under Rule 26, a rectification under Rule 91 or an amendment under Article 34(2)(b) of the description in relation to sequences contained in the application as filed shall be construed to also include any sequence listing included in the application, under the national law applied by the designated or elected Office concerned, by way of a correction (of a formality defect), rectification (of an obvious mistake) or amendment of the description in relation to sequences contained in the application as filed;

(iii) any reference to a sequence listing furnished for the purposes of international search or international preliminary examination shall be construed to also include any such listing furnished to the designated or elected Office concerned for the purposes of national search or examination by that Office;

(iv) the designated or elected Office concerned may invite the applicant to furnish to it, within a time limit which shall be reasonable under the circumstances, for the purposes of national search and/or examination, a sequence listing in electronic form complying with this Standard, unless such listing in electronic form is already available to that Office in a form and manner acceptable to it.

BASIC COMMON STANDARD FOR ELECTRONIC FILING

1. [No change]

2. BASIC COMMON STANDARD REQUIREMENTS

An international application complies with the basic common standard

– as to electronic document format, if it meets the following requirements:

(a) [No change]

(b) any sequence listing is presented in the electronic document format specified in paragraph 40 of the Standard for the Presentation of Nucleotide and Amino Acid Sequence Listings in International Patent Applications under the PCT (“Annex C/ST.25 text file”; see paragraph 40 of Annex C of the Administrative Instructions and WIPO Standard ST.25; see also Annex F, section 3.1.1.2);

[No change to the remainder of paragraph 2]

APPENDIX IV USE OF PHYSICAL MEDIA FOR THE E-PCT STANDARD

1. INTRODUCTION

(a) [No change]

(a-bis) This Appendix also defines the requirements for applicants for the submission of sequence listings in electronic form using physical media where the International Searching Authority or the International Preliminary Examining Authority (“Authority”) has notified the International Bureau under AIs Section 513(f) and 610(e), respectively, that it is requiring the furnishing of such listings, for the purposes of international search and preliminary examination, respectively, in electronic form on physical media.

(b) A receiving Office which has notified the International Bureau under AIs Section 710(a) that it is prepared to accept the filing of documents in electronic form on physical media and an Authority which has notified the International Bureau under AIs Section 513(f) or 610(e) that it is requiring the furnishing of sequence listings in electronic form on physical media shall, in addition to the indications required under those Sections, indicate the physical media types and the number of copies of the physical media that are required.

(c) The acceptable physical media types and formats shall be limited to those described in section 4 of this Appendix, below, provided that any receiving Office referred to in paragraph (a) shall, where the International Searching Authority or, if applicable, at least one of the International Searching Authorities competent for the international searching of international applications filed with that receiving Office has notified the International Bureau under Section 513(f) that it requires the furnishing of sequence listings in electronic form on physical media for the purposes of the international search, accept at least one physical media type that is accepted by that Authority, or, if applicable, by at least one of those Authorities.

(d) Electronic document formats are limited to those described in the main body of this Annex.

2. REQUIREMENTS FOR ELECTRONIC FILING USING PHYSICAL MEDIA

(a) [No change]

(b) The contents of each physical medium shall:

(i) subject to paragraph (b-bis), be packaged in accordance with section 4.1 or 4.2 of the main body of this Annex; and

(ii) subject to paragraph (c), be contained in a single file and be located in the root directory of the physical medium.

(b-*bis*) Where the physical medium contains a sequence listing furnished under Rule 13*ter*, the contents of the physical medium need not be packaged, unless the file containing such listing is compressed in accordance with paragraph (c-*bis*).

(c) A receiving Office or an Authority may limit the size of the files written on the physical medium. If, to comply with this requirement, a single document needs to be split into multiple files written on a single physical medium, or if a single document needs to be split into multiple files to be written on multiple physical media, such splitting shall be done such that the files can be rejoined to form one single contiguous file without any repeated or missing contents in accordance with either the ZIP file splitting standard or the Unix/Linux “split” command. In either case, the file names shall be in accordance with the defaults in those standards for splitting and recreating a file with a particular original name, for example, for “sequence-list.txt” in the case of ZIP split files: “sequence-list.z01”, “sequence-list.z02”, “sequence-list.zip”; or, in the case of Unix split files: “sequence-listaa.txt”, “sequence-listab.txt”, etc.

(c-*bis*) File compression is acceptable if done, in accordance with section 4.1.1 of the main body of this Annex, according to the ZIP standard (that standard allows the compression software to select from among a number of compression algorithms; the compression method must be “deflation” with the normal compression option).

(d) Each physical medium shall be enclosed in a hard case within an unsealed padded and protective mailing envelope and accompanied by a transmittal letter on paper. The transmittal letter shall state the contents of the physical medium (for example: “international application filed under Section 703” or “[*name of other kind of document*] filed under Section 703”). MODIFICATIONS OF THE ADMINISTRATIVE INSTRUCTIONS UNDER THE PCT

NOTE PREPARED BY THE INTERNATIONAL BUREAU

Following consultation with interested Offices and Authorities pursuant to PCT Rule 89.2(b) and the change procedure under Annex F of the Administrative Instructions under the PCT, modifications to Sections 706 and 710 and Annex F of the Administrative Instructions, as set out below, are promulgated with effect from 1 July 2008.

The modifications to Sections 706 and 710, as well as some of the modifications to Annex F, concern the use of “pre-conversion files” in electronic filing and processing of international applications. Other modifications of Annex F concern the change procedure used for proposing modifications to that Annex.

The modifications of the Administrative Instructions will apply to international applications filed on or after 1 July 2008 and to proposals for change to Annex F submitted on or after that date.

The consolidated text of the main body of the Administrative Instructions (PCT/AI/7) and of Annex F thereto (PCT/AI/ANF/3) will be available in due course on the WIPO website.

TEXT OF THE ADMINISTRATIVE INSTRUCTIONS

Section 706

Documents in Pre-Conversion Format

(a) Where, for the purposes of filing the international application in electronic form, the document making up the international application has been prepared by conversion from a different electronic document format (“pre-conversion format”), the applicant may, if the receiving Office so permits and the pre-conversion format is accepted for that purpose by that Office, submit, together with the international application, the document in the pre-conversion format, in which case:

(i) the document in the pre-conversion format shall be identified as such and shall be accompanied by a statement by the applicant that the international application as filed in electronic form is a complete and accurate copy of the document in the pre-conversion format;

(ii) the request shall preferably contain an indication that the document in the pre-conversion format is submitted under Section 706 together with the international application.

(b) Where it is found that the international application as filed in electronic form is not in fact a complete and accurate copy of the document in the pre-conversion format submitted under paragraph (a), the applicant may, within 30 months from the priority date, request the receiving Office to correct the international application so as to bring it into conformity with the document in the pre-conversion format. Rule 26.4 shall apply *mutatis mutandis* to the manner in which corrections under this paragraph shall be requested.

(c) Where the receiving Office, the International Searching Authority, the International Preliminary Examining Authority or the International Bureau discovers what appears to be a correctable defect under paragraph (b), that Office, Authority or Bureau, as the case may be, may bring such defect to the attention of the applicant, drawing attention to the correction procedure under paragraph (b).

(d) The applicant and, if copies of the international application have already been sent to the International Bureau and the International Searching Authority, that Bureau and that Authority shall be promptly notified by the receiving Office of any correction under paragraph (b). If required, the International Bureau shall notify the International Preliminary Examining Authority accordingly. Where a correction is made after the completion of the technical preparations for international publication, the International Bureau shall promptly publish the corrected international application together with a revised front page.

(e) A correction under paragraph (b) shall be taken into account by the International Searching Authority for the purposes of the international search and the establishment of the written opinion, and by the International Preliminary Examining Authority for the purposes of the international preliminary examination, if it is notified to that Authority before it has begun to draw up the international search report, the written opinion or the international preliminary examination report, as applicable, in which case the said report or opinion shall so indicate.

(f) Paragraphs (a) to (e) shall apply *mutatis mutandis* to any document making up any element of the international application referred to in Article 3(2).

Section 710

Notification and Publication of Receiving Offices' Requirements and Practices

(a) A notification by a receiving Office to the International Bureau under Rule 89*bis*.1(d) and Section 703(a) that it is prepared to receive international applications in electronic form shall indicate, where applicable:

(i) the electronic document formats (including, where applicable, the versions of such electronic document formats), means of transmittal, types of electronic packages, electronic filing software and types of electronic signature specified by it under Section 703(b)(i) to (iv) and (c), and any options specified by it under the basic common standard;

(ii) and (iii) [No change]

(iv) whether and under what conditions the Office accepts the filing, under Section 706(a) and (f), of documents in pre-conversion format and the electronic document formats (including, where applicable, the versions of such electronic document formats) accepted by it under that Section;

(v) to (vii) [No change]

(b) to (d) [No change]

ANNEX F
STANDARD FOR THE FILING AND PROCESSING
IN ELECTRONIC FORM OF INTERNATIONAL APPLICATIONS

[No change to the introductory paragraphs 1 to 4]

1. [No change]

2. THE E-PCT STANDARD: OVERVIEW AND VISION

[No change to the introductory text]

2.1 to 2.4 [No change]

2.5 *Change procedure*

2.5.1 *Scope*

It is necessary to modify the standard from time to time in the light of practical experience and of new technical developments. The change procedure outlined in this section constitutes the usual means by which the Director General undertakes consultation pursuant to PCT Rule 89.2(b) concerning proposals to modify the contents of Annex F (including its Appendices) (“proposals for change”), before deciding whether to promulgate such modifications. The procedures outlined in this section shall also be used as an additional means of information when changes are proposed to other parts of the Administrative Instructions which may have consequences for the technical requirements in this Annex.

2.5.2 *Web site; information list; Consultative Group*

The International Bureau maintains a Web site for the processing of proposals for change. The Web site provides for interested persons to register their e-mail addresses on the e-filing information list of persons who wish to be informed when proposals for change (or other materials relating to PCT electronic filing) are made available on the site.

The national Office of any State, and any PCT Authority, any intergovernmental organization (including any regional Office) and any non-governmental organization, that is invited to participate in meetings of the PCT Assembly may register, via the Web site, to participate in the work of a Consultative Group which considers proposals for change. It is strongly encouraged that the participants nominate as their representatives in the Consultative Group both technical and legal specialists to ensure that proposals for change are fully considered. Participants should preferably register at an early stage in the annual change management cycle outlined in section 2.5.4, below.

National Offices of PCT Contracting States and PCT International Authorities which register to participate in the Consultative Group do so as members, and other participants as observers. All Consultative Group members and observers are also automatically included in the e-filing information list. The International Bureau, as secretariat, coordinates the activities of the Group. Consideration of matters by the Group is informal and takes place via the Web site and e-mail and, where necessary, via other means of telecommunication; meetings of the Group in person are not envisaged.

Consultative Group members and observers are invited to discuss, and make recommendations on, how proposals for change should be handled and, in particular, whether changes should be promulgated and with what effective date, as outlined further below. It is expected that the Group would operate on the basis of consensus.

Consultative Group members and observers shall be informed by the International Bureau of any proposed modifications submitted under the ordinary consultation pursuant to PCT Rule 89.2(b) which include changes to Annex F, or which appear likely to the International Bureau to require consequential changes to Annex F if adopted.

2.5.3 *Proposals for change*

Proposals for change may be submitted to the International Bureau by any Office or Authority entitled to register as a member of the Consultative Group, and may be initiated by the International Bureau. An Office or Authority or the International Bureau may, if it wishes, submit a proposal for change that has been suggested to it by a third party. Proposals for change may be submitted, preferably via the Web site, at any time during the year.

A proposal for change may be modified or withdrawn by the Office or Authority that submitted it. Each proposal for change is published by the International Bureau on the Web site as a “Proposal for Change” (PFC) file to which comments, modifications, etc., are annexed. Exchanges of views on a proposal for change, if not annexed to the PFC file concerned, are stored in an archive accessible via the Web site.

Each proposal for change must set forth the requested modifications of the text and/or figures concerned, a list of items that may be impacted, the reason, including processing or policy issues involved, and the proposed date of implementation, including, if appropriate, a request for expedited handling, and should also, if possible, include a draft implementation (for example, a new XML DTD). It shall preferably also indicate if, in the view of the person making the proposal, the proposal is of a mere technical nature, or of a legal and technical nature.

Consideration of proposals for change would ordinarily proceed under the (standard) annual change management cycle in accordance with section 2.5.4. If needed, generally on request by the proposer, the International Bureau may determine, after consultation with the Consultative Group members and observers, that consideration of a proposal for change should be expedited in accordance with section 2.5.5. It is to be understood that consideration of any proposal for change resulting from a change to a PCT Contracting State’s national law relating to the standards contained in this Annex would be expedited.

2.5.4 *Annual change management cycle*

1. Each proposal for change received by the International Bureau is published on the Web site, forthwith after its receipt, in a PFC file together with an indication that comments on the proposal may be sent to the International Bureau. That publication is promptly notified by e-mail to the e-filing information list.
2. Any comments received from interested parties following the publication and notification of a proposal for change referred to in section 2.5.3 are promptly published on the Web site in the PFC file and notified by e-mail to the e-filing information list.

3. Further consideration of the proposal does not take place until the following February, unless expedited consideration is accorded to the proposal under section 2.5.5.
4. On or promptly after February 15, the International Bureau publishes on the Web site a list of all pending standard proposals for change and references to the relevant PFC files, with an indication that comments may be sent to the International Bureau by March 31, and sends a notification by e-mail to the e-filing information list. The International Bureau also sends a written circular to all PCT Offices and Authorities, interested intergovernmental organizations and certain non-governmental organizations representing users, referring to the Web site, inviting comments by March 31 and advising that paper copies of the proposals for change are available from the International Bureau.
5. Any further comments received by the International Bureau are published, forthwith after their receipt, in the PFC file on the Web site and notified by e-mail to the e-filing information list.
6. Promptly after March 31, the International Bureau invites the Consultative Group members and observers to consider the pending proposals for change and comments, and the Consultative Group members and observers make recommendations to the International Bureau by May 15. The recommendations are published forthwith in the PFC file on the Web site and notified by e-mail to the e-filing information list.
7. Taking into account the comments received and the recommendations of the Consultative Group members and observers, and after any necessary revision, the International Bureau publishes on the Web site, by June 30, modifications intended to come into force on January 1 of the following year or, exceptionally, before that date, and sends a notification by e-mail to the e-filing information list.
8. The usual procedures for promulgation of modifications of the Administrative Instructions apply (written circular and publication in the *PCT Gazette*).
9. If applicable, new or revised requirements of Offices are notified to the International Bureau, as provided for in Section 710 of the Administrative Instructions, for publication in the *PCT Gazette*.

2.5.5 *Expedited consideration of change proposals*

1. At any time, on request or at its own initiative, the International Bureau may decide that a proposal for change should be accorded expedited consideration, even if the proposal for change has so far been treated as standard.

2. Each proposal for change which is accorded expedited consideration is published on the Web site for comment and notified by e-mail to the e-filing information list, as outlined in section 2.5.4, paragraphs 1 and 2, except that comments are invited within six weeks. At the same time as that publication, the International Bureau sends the written circular referred to in section 2.5.4, paragraph 4, inviting comments within six weeks. Any comments received within six weeks are published, forthwith after their receipt, in the PFC file on the Web site and notified by e-mail to the e-filing information list.
3. In parallel to the actions referred to in paragraph 2, the International Bureau invites the Consultative Group members and observers to consider the proposal for change and any subsequent comments received during the six week period referred to in paragraph 2, and to make any recommendation before the end of that six week period, including a recommendation, if applicable, as to the appropriate date of entry into force of the proposed modifications. The recommendations are published forthwith in the PFC file on the Web site and notified by e-mail to the e-filing information list.
4. Taking into account the comments received and the recommendations of the Consultative Group members and observers, and after any necessary revision, the International Bureau publishes the modifications, and their date of entry into force, on the Web site, and sends a notification by e-mail to the e-filing information list.
5. The modifications are promulgated, and any new requirements of Offices are notified and published, as outlined in section 2.5.4, paragraphs 8 and 9.

MEETINGS OF THE INTERNATIONAL PATENT COOPERATION UNION – ASSEMBLY (THIRTY-FIFTH (20TH EXTRAORDINARY) SESSION)

NOTE PREPARED BY THE INTERNATIONAL BUREAU

In addition to the amendments to the Schedule of Fees annexed to the PCT Regulations and to the modifications of the Administrative Instructions under the PCT published in PCT Gazette No. 41/2006, of 12 October 2006, page 19092, a number of other amendments to the PCT Regulations and other changes affecting the PCT system were approved by the Assembly of the International Patent Cooperation Union (PCT Union) during its thirty-fifth (20th extraordinary) session, which was held in Geneva from 25 September to 3 October 2006 as part of the meetings of the Assemblies of the Member States of WIPO.

Documents which were prepared for the PCT Assembly as well as the report of the session are available on the WIPO website at:

www.wipo.int/meetings/en/details.jsp?meeting_code=pct/a/35

The said amendments and changes are outlined below.

Appointment of a new International Searching and Preliminary Examining Authority

The Assembly approved the text of the draft Agreement between the Nordic Patent Institute and the International Bureau and appointed the Nordic Patent Institute as an International Searching Authority (ISA) and International Preliminary Examining Authority (IPEA) with effect from the entry into force of that Agreement until December 31, 2007, bringing the number of Offices which have been appointed as ISA/IPEA to 13. The said Agreement will be published in Official Notices (PCT Gazette) in due course.

Amendments to the PCT Regulations

The Assembly adopted amendments to the PCT Regulations, further to those which were adopted in October 2005, which will enter into force on 1 April 2007¹ and will apply to international applications whose international filing date will be on or after that date. The amendments relate to:

i) minimum requirements for International Searching and Preliminary Examining Authorities (relating to the International Authorities' quality management systems and internal review arrangements);

ii) changes to physical requirements of the international application to assist optical character recognition (minimum text size requirements and procedure for making corrections);

iii) clarification of language-related requirements of the international application (relating to the language of indications in relation to deposited biological material, of corrections of defects in translations and of the international search report, and to the establishment of translations of international search reports, abstracts, etc.);

iv) clarifications and consequential amendments relating to amendments previously adopted by the Assembly.

The text of the amended Rules is reproduced on pages 4 to 9.

Together with the approval of amendments to the PCT Regulations, the Assembly also made decisions relating to entry into force and transitional arrangements, and agreed upon understandings relating to certain provisions. The text of both the decisions and the understandings may be found on page 10 and page 11, respectively.

PCT Reform

The Assembly agreed that there would be a further session of the Working Group on Reform of the PCT before the 2007 session of the Assembly to consider outstanding proposals for reform of the PCT including, in particular, options for applicants to request international publication in multiple languages and supplementary searches to be carried out by Authorities other than the main International Searching Authority, as well as proposals relating to declaration of the source of genetic resources and traditional knowledge in patent applications. The Assembly noted that there are only a few PCT reform-related items remaining on the agenda of the Working Group and that the next meeting of the Working Group would most likely be the last in the present reform exercise.

Quality management systems for PCT International Authorities, quality of international searches, PCT information systems report

The Assembly also received status reports on quality management systems for PCT International Authorities, on projects related to improving the quality of international searches and on PCT automation.

¹ For the amendments adopted in October 2005 which will enter into force on 1 April 2007, see PCT Gazette No. 08/2006, of 23 February 2006, pages 5496 to 5540.

Section 308bis
Marking of Later Submitted Sheets

The receiving Office shall indelibly mark any sheet containing an element referred to in Article 11(1)(iii)(d) or (e), or a part referred to in Rule 20.5(a), received on a date later than the date on which sheets were first received (“later submitted sheet”), in the upper right-hand corner of each sheet, with the international application number referred to in Section 307 and the date of actual receipt of that sheet.

(e) Where later submitted sheets referred to in paragraph (a) are received after the expiration of the applicable time limit referred to in Rule 20.7, the receiving Office shall proceed as provided in Section 310*ter*.

(i) accord the international filing date in accordance with Rules 20.3(b)(i) or 20.5(b), or effect the required correction of the international filing date in accordance with Rule 20.5(c), as the case may be;

(ii) notify the applicant of the correction or the according of the international filing date effected under item (i);

(iii) keep in its files a copy of the later submitted sheets;

(v) where transmittals under Article 12(1) have not yet been made, attach the later submitted sheets to the record copy and a copy thereof to the search copy.

(c) Where later submitted sheets referred to in paragraph (a) are received within the applicable time limit referred to in Rule 20.7 but the purported international application still does not fulfill the requirements of Article 11(1), the receiving Office shall proceed as provided in Rule 20.4.

(d) Where later submitted sheets referred to in paragraph (a) are received after the expiration of the applicable time limit referred to in Rule 20.7, the receiving Office shall proceed as provided in Section 310*ter*.

Following the consultations undertaken by the Director General at the time of the thirty-sixth (16th ordinary) session of the Assembly of the International Patent Cooperation Union (PCT Union) held in Geneva from 24 September to 3 October 2007, and pursuant to PCT Rules 15.2(d) and 57.2(e), new equivalent amounts of the international filing fee, of the fee per sheet over 30 and of the handling fee, together with the equivalent amounts for the reductions under item 3 of the Schedule of Fees, have been established, with effect from 1 January 2008, in various currencies, as indicated in the table published on pages 156 and 157.

Pursuant to PCT Rule 16.1(d), new equivalent amounts of the search fee have been established in receiving offices' currencies for all International Searching Authorities, with effect from 1 January 2008, as indicated in the table published on page 158. MEETINGS OF THE INTERNATIONAL PATENT COOPERATION UNION – ASSEMBLY (THIRTY-SIXTH (16TH ORDINARY) SESSION)

NOTE PREPARED BY THE INTERNATIONAL BUREAU

A number of amendments to the PCT Regulations, as well as the texts of the Agreements between the International Bureau of WIPO and Offices appointed as International Searching and/or Preliminary Examining Authorities under the PCT, were approved by the Assembly of the International Patent Cooperation Union (PCT Union) during its thirty-sixth (16th ordinary) session, which was held in Geneva from 24 September to 3 October 2007 as part of the meetings of the Assemblies of the Member States of WIPO.

Documents which were prepared for the PCT Assembly, and which give detailed background information relating to the decisions that were taken, are available, and the report of the session will be available shortly, on the WIPO website at:

www.wipo.int/meetings/en/details.jsp?meeting_id=13306

The said amendments to the PCT Regulations will enter into force at two different times. The first set of amendments (set out on pages 165 to 169) will enter into force on 1 July 2008. The second set of amendments (set out on pages 170 to 177) will enter into force on 1 January 2009.

The amendments due to enter into force on 1 July 2008 provide for:

(i) the use, in carrying out the international search, of the results of an earlier search carried out by an International Searching Authority or any national Office other than the Office acting as International Searching Authority (Rules 4.1, 4.11, 4.12, 12*bis*, 16.3 and 41.1),

(ii) the authority, by receiving Offices, to extend the time period for the applicant to pay the fee for requesting restoration of the right of priority (Rule 26*bis*.3(d)),

(iii) the clarification that international publication can only be reliably prevented by way of an express withdrawal under Rule 90*bis*.1 received by the International Bureau prior to completion of technical preparations for international publication. The intention is to avoid applicants' reliance on Rule 29.1 to have the international application "considered withdrawn" by the receiving Office for any of the reasons outlined in the said Rule (failure to pay the required fees being the most common), disregarding the substantial risk that, where the declaration by the receiving Office that the application is considered withdrawn reaches the International Bureau only after completion of technical preparations for international publication, the international application will be published, despite the fact that it is considered withdrawn (Rule 29.1).

The amendments due to enter into force on 1 January 2009 provide for:

(i) a system of supplementary international searches within the PCT, whereby an applicant has the option to request, in addition to the "main" international search, one or more supplementary searches to be carried out by International Authorities other than the International Searching Authority that carries out the main international search (Rule 45*bis* and Schedule of Fees),

(ii) the inclusion of the Korean and Portuguese languages in the list of official languages of publication in the PCT Regulations (Rule 48.3(a)).

The Agreements referred to above will be the subject of later publication.

(f) Where a copy or translation referred to in paragraphs (a) and (b) is available to the International Searching Authority in a form and manner acceptable to it, for example, from a digital library or in the form of the priority document, and the applicant so indicates in the request, no copy or translation shall be required to be submitted under those paragraphs.

AMENDMENTS OF THE REGULATIONS UNDER THE PCT
(to enter into force on 1 January 2009)

Rule 45bis
Supplementary International Searches

45bis.1 Supplementary Search Request

(a) The applicant may, at any time prior to the expiration of 19 months from the priority date, request that a supplementary international search be carried out in respect of the international application by an International Searching Authority that is competent to do so under Rule 45bis.9. Such requests may be made in respect of more than one such Authority.

(b) A request under paragraph (a) (“supplementary search request”) shall be submitted to the International Bureau and shall indicate:

(i) the name and address of the applicant and of the agent (if any), the title of the invention, the international filing date and the international application number;

(ii) the International Searching Authority that is requested to carry out the supplementary international search (“Authority specified for supplementary search”); and

(iii) where the international application was filed in a language which is not accepted by that Authority, whether any translation furnished to the receiving Office under Rule 12.3 or 12.4 is to form the basis of the supplementary international search.

(c) The supplementary search request shall, where applicable, be accompanied by:

(i) where neither the language in which the international application was filed nor that in which a translation (if any) has been furnished under Rule 12.3 or 12.4 is accepted by the Authority specified for supplementary search, a translation of the international application into a language which is accepted by that Authority;

(ii) preferably, a copy of a sequence listing in electronic form complying with the standard provided for in the Administrative Instructions, if required by the Authority specified for supplementary search.

(d) Where the International Searching Authority has found that the international application does not comply with the requirement of unity of invention, the supplementary search request may contain an indication of the wish of the applicant to limit the supplementary international search to one of the inventions as identified by the International Searching Authority other than the main invention referred to in Article 17(3)(a).

(e) The supplementary search request shall be considered not to have been submitted, and the International Bureau shall so declare:

(i) if it is received after the expiration of the time limit referred to in paragraph (a); or

(ii) if the Authority specified for supplementary search has not stated, in the applicable agreement under Article 16(3)(b), its preparedness to carry out such searches or is not competent to do so under Rule 45bis.9(b).

45bis.2 *Supplementary Search Handling Fee*

(a) The supplementary search request shall be subject to the payment of a fee for the benefit of the International Bureau (“supplementary search handling fee”) as set out in the Schedule of Fees.

(b) The supplementary search handling fee shall be paid in the currency in which the fee is set out in the Schedule of Fees or in any other currency prescribed by the International Bureau. The amount in such other currency shall be the equivalent, in round figures, as established by the International Bureau, of the amount as set out in the Schedule of Fees, and shall be published in the Gazette.

(c) The supplementary search handling fee shall be paid to the International Bureau within one month from the date of receipt of the supplementary search request. The amount payable shall be the amount applicable on the date of payment.

(d) The International Bureau shall refund the supplementary search handling fee to the applicant if, before the documents referred to in Rule 45bis.4(e)(i) to (iv) are transmitted to the Authority specified for supplementary search, the supplementary search request is withdrawn or considered not to have been submitted.

45bis.3 *Supplementary Search Fee*

(a) Each International Searching Authority carrying out supplementary international searches may require that the applicant pay a fee (“supplementary search fee”) for its own benefit for carrying out such a search.

(b) The supplementary search fee shall be collected by the International Bureau. Rules 16.1(b) to (e) shall apply *mutatis mutandis*.

(c) As to the time limit for payment of the supplementary search fee and the amount payable, the provisions of Rule 45bis.2(c) shall apply *mutatis mutandis*.

(d) The International Bureau shall refund the supplementary search fee to the applicant if, before the documents referred to in Rule 45bis.4(e)(i) to (iv) are transmitted to the Authority specified for supplementary search, the supplementary search request is withdrawn or considered not to have been submitted.

(e) The Authority specified for supplementary search shall, to the extent and under the conditions provided for in the applicable agreement under Article 16(3)(b), refund the supplementary search fee if, before it has started the supplementary international search in accordance with Rule 45bis.5(a), the supplementary search request is considered not to have been submitted.

45bis.4 Checking of Supplementary Search Request; Correction of Defects; Late Payment of Fees; Transmittal to International Searching Authority

(a) Promptly after receipt of a supplementary search request, the International Bureau shall check whether it complies with the requirements of Rule 45bis.1(b) and (c)(i) and shall invite the applicant to correct any defects within a time limit of one month from the date of the invitation.

(b) Where, by the time they are due under Rules 45bis.2(c) and 45bis.3(c), the International Bureau finds that the supplementary search handling fee and the supplementary search fee have not been paid in full, it shall invite the applicant to pay to it the amount required to cover those fees, together with the late payment fee under paragraph (c), within a time limit of one month from the date of the invitation.

(c) The payment of fees in response to an invitation under paragraph (b) shall be subject to the payment to the International Bureau, for its own benefit, of a late payment fee whose amount shall be 50% of the supplementary search handling fee.

(d) If the applicant does not furnish the required correction or does not pay the amount in full of the fees due, including the late payment fee, before the expiration of the time limit applicable under paragraph (a) or (b), respectively, the supplementary search request shall be considered not to have been submitted and the International Bureau shall so declare and shall inform the applicant accordingly.

(e) On finding that the requirements of Rule 45bis.1(b) and (c)(i), 45bis.2(c) and 45bis.3(c) have been complied with, the International Bureau shall promptly, but not before the date of receipt by it of the international search report or the expiration of 17 months from the priority date, whichever occurs first, transmit to the Authority specified for supplementary search a copy of each of the following:

- (i) the supplementary search request;
- (ii) the international application;
- (iii) any sequence listing furnished under Rule 45bis.1(c)(ii); and
- (iv) any translation furnished under Rule 12.3, 12.4 or 45bis.1(c)(i) which is to be used as the basis of the supplementary international search;

and, at the same time, or promptly after their later receipt by the International Bureau:

- (v) the international search report and the written opinion established under Rule 43bis.1;
- (vi) any invitation by the International Searching Authority to pay additional fees referred to in Article 17(3)(a); and
- (vii) any protest by the applicant under Rule 40.2(c) and the decision thereon by the review body constituted in the framework of the International Searching Authority.

(f) Upon request of the Authority specified for supplementary search, the written opinion referred to in paragraph (e)(v) shall, when not in English or in a language accepted by that Authority, be translated into English by or under the responsibility of the International Bureau. The International Bureau shall transmit a copy of the translation to that Authority within two months from the date of receipt of the request for translation, and shall at the same time transmit a copy to the applicant.

45bis.5 Start, Basis and Scope of Supplementary International Search

(a) The Authority specified for supplementary search shall start the supplementary international search promptly after receipt of the documents specified in Rule 45bis.4(e)(i) to (iv), provided that the Authority may, at its option, delay the start of the search until it has also received the documents specified in Rule 45bis.4(e)(v) or until the expiration of 22 months from the priority date, whichever occurs first.

(b) The supplementary international search shall be carried out on the basis of the international application as filed or of a translation referred to in Rule 45bis.1(b)(iii) or 45bis.1(c)(i), taking due account of the international search report and the written opinion established under Rule 43bis.1 where they are available to the Authority specified for supplementary search before it starts the search. Where the supplementary search request contains an indication under Rule 45bis.1(d), the supplementary international search may be limited to the invention specified by the applicant under Rule 45bis.1(d) and those parts of the international application which relate to that invention.

(c) For the purposes of the supplementary international search, Article 17(2) and Rules 13ter.1, 33 and 39 shall apply *mutatis mutandis*.

(d) Where the international search report is available to the Authority specified for supplementary search before it starts the search under paragraph (a), that Authority may exclude from the supplementary search any claims which were not the subject of the international search.

(e) Where the International Searching Authority has made the declaration referred to in Article 17(2)(a) and that declaration is available to the Authority specified for supplementary search before it starts the search under paragraph (a), that Authority may decide not to establish a supplementary international search report, in which case it shall so declare and promptly notify the applicant and the International Bureau accordingly.

(f) The supplementary international search shall cover at least the documentation indicated for that purpose in the applicable agreement under Article 16(3)(b).

(g) If the Authority specified for supplementary search finds that carrying out the search is excluded by a limitation or condition referred to in Rule 45bis.9(a), the supplementary search request shall be considered not to have been submitted, and the Authority shall so declare and shall promptly notify the applicant and the International Bureau accordingly.

45bis.6 *Unity of Invention*

(a) If the Authority specified for supplementary search finds that the international application does not comply with the requirement of unity of invention, it shall:

(i) establish the supplementary international search report on those parts of the international application which relate to the invention first mentioned in the claims (“main invention”);

(ii) notify the applicant of its opinion that the international application does not comply with the requirement of unity of invention and specify the reasons for that opinion; and

(iii) inform the applicant of the possibility of requesting, within the time limit referred to in paragraph (c), a review of the opinion.

(b) In considering whether the international application complies with the requirement of unity of invention, the Authority shall take due account of any documents received by it under Rule 45bis.4(e)(vi) and (vii) before it starts the supplementary international search.

(c) The applicant may, within one month from the date of the notification under paragraph (a)(ii), request the Authority to review the opinion referred to in paragraph (a). The request for review may be subjected by the Authority to the payment to it, for its own benefit, of a review fee whose amount shall be fixed by it.

(d) If the applicant, within the time limit under paragraph (c), requests a review of the opinion by the Authority and pays any required review fee, the opinion shall be reviewed by the Authority. The review shall not be carried out only by the person who made the decision which is the subject of the review. Where the Authority:

(i) finds that the opinion was entirely justified, it shall notify the applicant accordingly;

(ii) finds that the opinion was partially unjustified but still considers that the international application does not comply with the requirement of unity of invention, it shall notify the applicant accordingly and, where necessary, proceed as provided for in paragraph (a)(i);

(iii) finds that the opinion was entirely unjustified, it shall notify the applicant accordingly, establish the supplementary international search report on all parts of the international application and refund the review fee to the applicant.

(e) On the request of the applicant, the text of both the request for review and the decision thereon shall be communicated to the designated Offices together with the supplementary international search report. The applicant shall submit any translation thereof with the furnishing of the translation of the international application required under Article 22.

(f) Paragraphs (a) to (e) shall apply *mutatis mutandis* where the Authority specified for supplementary search decides to limit the supplementary international search in accordance

with the second sentence of Rule 45bis.5(b), provided that any reference in the said paragraphs to the “international application” shall be construed as a reference to those parts of the international application which relate to the invention specified by the applicant under Rule 45bis.1(d).

45bis.7 Supplementary International Search Report

(a) The Authority specified for supplementary search shall, within 28 months from the priority date, establish the supplementary international search report, or make the declaration referred to in Article 17(2)(a) as applicable by virtue of Rule 45bis.5(c) that no supplementary international search report will be established.

(b) Every supplementary international search report, any declaration referred to in Article 17(2)(a) as applicable by virtue of Rule 45bis.5(c) and any declaration under Rule 45bis.5(e) shall be in a language of publication.

(c) For the purposes of establishing the supplementary international search report, Rules 43.1, 43.2, 43.5, 43.6, 43.6bis, 43.8 and 43.10 shall, subject to paragraphs (d) and (e), apply *mutatis mutandis*. Rule 43.9 shall apply *mutatis mutandis*, except that the references therein to Rules 43.3, 43.7 and 44.2 shall be considered non-existent. Article 20(3) and Rule 44.3 shall apply *mutatis mutandis*.

(d) The supplementary international search report need not contain the citation of any document cited in the international search report, except where the document needs to be cited in conjunction with other documents that were not cited in the international search report.

(e) The supplementary international search report may contain explanations:

- (i) with regard to the citations of the documents considered to be relevant;

Restoration of Right of Priority by Designated Office***49ter.1 Effect of Restoration of Right of Priority by Receiving Office*

(a) Where the receiving Office has restored a right of priority under Rule 26bis.3 based on a finding by it that the failure to file the international application within the priority period occurred in spite of due care required by the circumstances having been taken, that restoration shall, subject to paragraph (c), be effective in each designated State.

(b) Where the receiving Office has restored a right of priority under Rule 26bis.3 based on a finding by it that the failure to file the international application within the priority period was unintentional, that restoration shall, subject to paragraph (c), be effective in any designated State whose applicable national law provides for restoration of the right of priority based on that criterion or on a criterion which, from the viewpoint of applicants, is more favorable than that criterion.

(c) A decision by the receiving Office to restore a right of priority under Rule 26bis.3 shall not be effective in a designated State where the designated Office, a court or any other competent organ of or acting for that designated State finds that a requirement under Rule 26bis.3(a), (b)(i) or (c) was not complied with, taking into account the reasons stated in the request submitted to the receiving Office under Rule 26bis.3(a) and any declaration or other evidence filed with the receiving Office under Rule 26bis.3(b)(iii).

(d) A designated Office shall not review the decision of the receiving Office unless it may reasonably doubt that a requirement referred to in paragraph (c) was complied with, in which case the designated Office shall notify the applicant accordingly, indicating the reasons for that doubt and giving the applicant an opportunity to make observations within a reasonable time limit.

(e) No designated State shall be bound by a decision of the receiving Office refusing a request under Rule 26bis.3 for restoration of the right of priority.

(f) Where the receiving Office has refused a request for the restoration of the right of priority, any designated Office may consider that request to be a request for restoration submitted to that designated Office under Rule 49ter.2(a) within the time limit under that Rule.

(g) If, on October 5, 2005, paragraphs (a) to (d) are not compatible with the national law applied by the designated Office, those paragraphs shall not apply in respect of that Office for as long as they continue not to be compatible with that law, provided that the said Office informs the International Bureau accordingly by April 5, 2006. The information received shall be promptly published by the International Bureau in the Gazette.

49ter.2 Restoration of Right of Priority by Designated Office

(a) Where the international application claims the priority of an earlier application and has an international filing date which is later than the date on which the priority period expired but within the period of two months from that date, the designated Office shall, on the request of the applicant in accordance with paragraph (b), restore the right of priority if the Office finds that a criterion applied by it (“criterion for restoration”) is satisfied, namely, that the failure to file the international application within the priority period:

- (i) occurred in spite of due care required by the circumstances having been taken; or
- (ii) was unintentional.

Each designated Office shall apply at least one of those criteria and may apply both of them.

a) Lorsque l'office récepteur a restauré un droit de priorité en vertu de la règle 26bis.3 après avoir constaté que la demande internationale n'a pas été déposée dans le délai de priorité bien que la diligence requise en l'espèce ait été exercée, cette restitution produit ses effets dans chaque État désigné, sous réserve de l'alinéa c).

b) Lorsque l'office récepteur a restauré un droit de priorité en vertu de la règle 26bis.3 après avoir constaté que la demande internationale n'a pas été déposée dans le délai de priorité et que l'inobservation du délai n'a pas été intentionnelle, cette restauration produit ses effets, sous réserve de l'alinéa c), dans tous les États désignés dont la législation nationale applicable prévoit la restauration du droit de priorité en fonction de ce critère ou d'un critère qui, du point de vue des déposants, est plus favorable que ce critère.

c) Une décision de l'office récepteur à l'effet de restaurer un droit de priorité en vertu de la règle 26bis.3 est sans effet dans un État désigné lorsque l'office désigné, les tribunaux ou tous autres organes compétents de l'État désigné ou agissant pour ce dernier constatent qu'une exigence visée à la règle 26bis.3.a), b)i) ou c) n'a pas été observée, compte tenu des raisons indiquées dans la requête présentée à l'office récepteur conformément à la règle 26bis.3.a) et de toute déclaration ou autres preuves communiquées à l'office récepteur conformément à la règle 26bis.3.b)iii).

d) Un office désigné ne peut réexaminer la décision de l'office récepteur que s'il a des raisons de douter qu'une exigence visée à l'alinéa c) n'a pas été observée. g) Si, le 5 octobre 2005, les alinéas a) à d) ne sont pas compatibles avec la législation nationale appliquée par l'office désigné, ces alinéas ne s'appliquent pas à l'égard de cet office tant qu'ils restent incompatibles avec cette législation, à condition que ledit office en informe le Bureau international le 5 avril 2006 au plus tard. Le Bureau international publie à bref délai dans la gazette les informations reçues.

49ter.2 Restauration du droit de priorité par l'office désigné

a) Lorsque la demande internationale revendique la priorité d'une demande antérieure et a une date de dépôt international qui est postérieure à la date d'expiration du délai de priorité mais qui s'inscrit dans un délai de deux mois à compter de cette date, l'office désigné, sur requête du déposant, restaure le droit de priorité conformément à l'alinéa b) s'il constate qu'il est satisfait à un critère appliqué par lui ("critère de restauration"), c'est-à-dire que la demande internationale n'a pas été déposée dans le délai de priorité

- (ii) the mistake is in the abstract;
- (iii) the mistake is in an amendment under Article 19, unless the International Preliminary Examining Authority is competent to authorize the rectification of such mistake under paragraph (b)(iii); or
- (iv) the mistake is in a priority claim or in a notice correcting or adding a priority claim under Rule 26bis.1(a), where the rectification of the mistake would cause a change in the priority date;

provided that this paragraph shall not affect the operation of Rules 20.4, 20.5, 26bis and 38.3.

(h) Where the receiving Office, the International Searching Authority, the International Preliminary Examining Authority or the International Bureau discovers what appears to be a rectifiable obvious mistake in the international application or another document, it may invite the applicant to request rectification under this Rule.

91.2 Requests for Rectification

A request for rectification under Rule 91.1 shall be submitted to the competent authority within 26 months from the priority date. It shall specify the mistake to be rectified and the proposed rectification, and may, at the option of the applicant, contain a brief explanation. Rule 26.4 shall apply *mutatis mutandis* as to the manner in which the proposed rectification shall be indicated.

91.3 Authorization and Effect of Rectifications

(a) The competent authority shall promptly decide whether to authorize or refuse to authorize a rectification under Rule 91.1 and shall promptly notify the applicant and the International Bureau of the authorization or refusal and, in the case of refusal, of the reasons therefor. The International Bureau shall proceed as provided for in the Administrative Instructions, including, as required, notifying the receiving Office, the International Searching Authority, the International Preliminary Examining Authority and the designated and elected Offices of the authorization or refusal.

(b) Where the rectification of an obvious mistake has been authorized under Rule 91.1, the document concerned shall be rectified in accordance with the Administrative Instructions.

(c) Where the rectification of an obvious mistake has been authorized, it shall be effective:

- (i) in the case of a mistake in the international application as filed, from the international filing date;
- (ii) in the case of a mistake in a document other than the international application as filed, including a mistake in a correction or an amendment of the international application, from the date on which that document was submitted.

(d) Where the competent authority refuses to authorize a rectification under Rule 91.1, the International Bureau shall, upon request submitted to it by the applicant within two months from the date of the refusal, and subject to the payment of a special fee whose amount shall be fixed in the Administrative Instructions, publish the request for rectification, the reasons for refusal by the authority and any further brief comments that may be submitted by the applicant, if possible together with the international application. A copy of the request, reasons and comments (if any) shall if possible be included in the communication under Article 20 where the international application is not published by virtue of Article 64(3).

- ii) si elle figure dans l'abrégé;
- iii) si elle figure dans une modification en vertu de l'article 19, à moins que l'administration chargée de l'examen préliminaire international ne soit compétente pour autoriser la rectification de l'erreur en vertu de l'alinéa b)iii); ou
- iv) si elle figure dans une revendication de priorité ou une communication tendant à corriger ou compléter une revendication de priorité en vertu de la règle 26bis.1.a), lorsque la rectification de l'erreur entraînerait un changement de date de priorité;

sous réserve que cet alinéa n'affecte pas l'application des règles 20.4, 20.5, 26bis et 38.3.

h) Lorsque l'office récepteur, l'administration chargée de la recherche internationale, l'administration chargée de l'examen préliminaire international ou le Bureau international découvre ce qui semble constituer une erreur évidente rectifiable dans la demande internationale ou dans un autre document, il peut inviter le déposant à demander une rectification en vertu de la présente règle.

91.2 Requêtes en rectification

Une requête en rectification en vertu de la règle 91.1 doit être présentée à l'administration compétente dans un délai de 26 mois à compter de la date de priorité. Elle doit préciser l'erreur à rectifier et la rectification proposée et peut, au choix du déposant, contenir une explication succincte. La règle 26.4 s'applique, *mutatis mutandis*, à la procédure à suivre pour indiquer la rectification proposée.

91.3 Autorisation et effet des rectifications

a) L'administration compétente décide à bref délai soit d'autoriser soit de refuser d'autoriser une rectification en vertu de la règle 91.1 et notifie à bref délai sa décision au déposant et au Bureau international, en la motivant s'il s'agit d'un refus. Le Bureau international procède de la manière prévue dans les instructions administratives, y compris, le cas échéant, en notifiant son autorisation ou son refus à l'office récepteur, à l'administration chargée de la recherche internationale, à l'administration chargée de l'examen préliminaire international et aux offices désignés et élus.

b) Lorsque la rectification d'une erreur évidente a été autorisée en vertu de la règle 91.1, le document considéré est corrigé conformément aux instructions administratives.

c) Lorsque la rectification d'une erreur évidente a été autorisée, elle prend effet :

i) en cas d'erreur dans la demande internationale telle qu'elle a été déposée, à la date du dépôt international;

ii) en cas d'erreur dans un document autre que la demande internationale telle qu'elle a été déposée, y compris dans une correction ou une modification apportée à la demande internationale, à la date à laquelle ce document a été remis.

d) Lorsque l'autorité compétente refuse d'autoriser une rectification en vertu de la règle 91.1, le Bureau international, si le déposant lui en fait la demande dans les deux mois suivant la date du refus et sous réserve du paiement d'une taxe spéciale dont le montant est fixé dans les instructions administratives, publie la requête en rectification, les motifs du refus de l'administration et toutes autres observations succinctes éventuellement formulées par le déposant, si possible avec la demande internationale. Une copie de la requête, des motifs et des observations (éventuelles) est, si possible, insérée dans la communication selon l'article 20 lorsque, en vertu de l'article 64.3), la demande internationale n'est pas publiée.

(e) The rectification of an obvious mistake need not be taken into account by any designated Office in which the processing or examination of the international application has already started prior to the date on which that Office is notified under Rule 91.3(a) of the authorization of the rectification by the competent authority.

(f) A designated Office may disregard a rectification that was authorized under Rule 91.1 if it finds that it would not have authorized the rectification if it had been the competent authority.

e) La rectification d'une erreur évidente n'a pas à être prise en considération par un office désigné dans lequel le traitement ou l'examen de la demande internationale a déjà commencé avant la date à laquelle cet office a été informé selon la règle 91.3.a) de l'autorisation de rectification donnée par l'administration compétente.

f) Un office désigné peut ne pas tenir compte d'une rectification autorisée en vertu de la règle 91.1 s'il constate qu'il ne l'aurait pas autorisée s'il avait été l'administration compétente.

**MEETINGS OF THE INTERNATIONAL PATENT COOPERATION UNION – ASSEMBLY
(THIRTY-FOURTH (15TH ORDINARY) SESSION) (cont'd)****AMENDMENTS OF THE REGULATIONS UNDER THE PCT: UNDERSTANDINGS RELATING TO CERTAIN PROVISIONS**

1. In connection with the adoption of amended Rule 4.9(b) (see page 5486), the Assembly noted that, in order to avoid the need for complicated transitional provisions, notifications of incompatibility under amended Rule 4.9(b) will be required to be given by all affected designated Offices, even if they have already given notifications under the existing Rule.
2. In connection with the adoption of amended Rule 20.8(a) (see page 5508), the Assembly noted that the availability of the procedure under that Rule depends on the existence of an incompatibility with the Rules referred to in that Rule of the national law applicable to a national Office in its capacity as a PCT receiving Office, as distinct from its capacity as a designated Office, and that such incompatibility might arise either from express national law provisions dealing with the subject matter in question or from the more general operation of the national law.
3. In connection with the adoption of amended Rule 26bis.3(a) (see page 5514), the Assembly noted that a receiving Office may, if it wishes, apply both criteria for restoration and leave the choice to the applicant as to which criterion is sought to be applied in a specific case, noting that it would be advantageous for the applicant to obtain a positive finding by the receiving Office on the stricter criterion of “due care” since such a finding would in general be effective in all designated States, unlike a finding on the less strict “unintentionality” criterion. Furthermore, a receiving Office will be free to apply, upon request of the applicant, first the “due care” criterion and then, if the receiving Office finds that that criterion is not complied with, the “unintentionality” criterion.
4. In connection with the adoption of amended Rule 26bis.3(f) (see page 5516), the Assembly noted that the question of what information or evidence each receiving Office is entitled to require in support of a request for restoration of the right of priority under Rule 26bis.3(f) is a matter left to national law and practice.
5. In connection with the adoption of amended Rule 48.2(a)(xi) (see page 5520), the Assembly noted that information as to the criterion for restoration upon which the decision by the Office was based (“due care” criterion, “unintentionality” criterion, or both criteria) will be included in the publication of the international application under new Rule 48.2(a)(xi).
6. In connection with the adoption of amended Rule 49ter.1(g) (see page 5524), the Assembly noted that the giving of a notification of incompatibility under Rule 49ter.1(g) will have both procedural and substantive effects; for example, there will be consequences both in terms of calculating the time limit for national phase entry before the designated Office concerned and in terms of the assessment of novelty and inventive step during the national search and examination.
7. In connection with the adoption of amended Rule 49ter.2(a) (see page 5524), the Assembly noted that a designated Office may, if it wishes, apply both criteria for restoration and leave the choice to the applicant as to which criterion is sought to be applied in a specific case. Furthermore, a designated Office will be free to apply, upon request of the applicant, first the “due care” criterion and then, if the designated Office finds that that criterion is not complied with, the “unintentionality” criterion.
8. In connection with the adoption of amended Rule 49ter.2(b)(i) (see page 5526), the Assembly noted that, where the effect of the international application provided for in Article 11(3) ceases because the applicant fails to perform the acts referred to in Article 22 or 39(1) within the applicable time limit but the designated Office reinstates the rights of the applicant with respect to that international application in accordance with Rule 49.6 or 76.5(ii), respectively, such reinstatement will extend to all time limits calculated on the basis of the applicable time limit under Article 22 or 39(1), respectively, including the time limit under Rule 49ter.2(b)(i).

RÉUNIONS DE L'UNION INTERNATIONALE DE COOPÉRATION EN MATIÈRE DE BREVETS – ASSEMBLÉE (TRENTE-QUATRIÈME SESSION (15^e SESSION ORDINAIRE)) (suite)**MODIFICATIONS DU RÈGLEMENT D'EXÉCUTION DU PCT : ACCORDS DE PRINCIPE RELATIFS À CERTAINES DISPOSITIONS**

1. En adoptant la règle 4.9.b) modifiée (voir la page 5487), l'assemblée a pris note du fait que, afin d'éviter des dispositions transitoires compliquées, les réserves formulées en vertu de la règle 4.9.b) modifiée devront l'être par tous les offices désignés concernés, même s'ils les ont déjà formulées en vertu de la règle en vigueur.
2. En adoptant la règle 20.8.a) modifiée (voir la page 5509), l'assemblée a pris note du fait que la possibilité d'utiliser la procédure prévue par la règle 20.8.a) dépendra de l'existence d'une incompatibilité avec les règles mentionnées dans cette règle de la législation nationale applicable à un office national en sa qualité d'office récepteur du PCT, par opposition à sa qualité d'office désigné, et que cette incompatibilité peut découler soit de dispositions expresses de législation nationale traitant de l'objet en question, soit du fonctionnement plus général de la législation nationale.
3. En adoptant la règle 26bis.3.a) modifiée (voir la page 5515), l'assemblée a pris note du fait qu'un office récepteur peut, s'il le souhaite, appliquer les deux critères de restauration et laisser au déposant le choix du critère à appliquer dans un cas déterminé, et qu'il serait intéressant pour le déposant d'obtenir une réponse positive de l'office récepteur fondée sur le critère plus strict de la "diligence requise" car cette décision serait valable dans tous les États désignés, alors que tel ne serait pas le cas si l'office récepteur fondait sa décision sur le critère moins strict du "caractère non intentionnel". En outre, un office récepteur sera libre d'appliquer, à la demande du déposant, tout d'abord le critère de la "diligence requise" et, si l'office récepteur constate qu'il n'est pas satisfait à ce critère, le critère du "caractère non intentionnel".
4. En adoptant la règle 26bis.3.f) modifiée (voir la page 5517), l'assemblée a pris note du fait que la question de savoir quelles informations ou preuves chaque office récepteur est en droit d'exiger à l'appui d'une requête en restauration du droit de priorité selon la règle 26bis.3.f) demeure du ressort de la législation et de la pratique nationales.
5. En adoptant la règle 48.2.a).xi) modifiée (voir la page 5521), l'assemblée a pris note du fait qu'il sera fait mention du critère de restauration sur lequel s'est fondée la décision de l'office (critère de la "diligence requise" ou critère du "caractère non intentionnel", ou l'un et l'autre de ces critères) dans la publication de la demande internationale en vertu de la nouvelle règle 48.2.a).xi).
6. En adoptant la règle 49ter.1.g) modifiée (voir la page 5525), l'assemblée a pris note du fait qu'une réserve formulée en vertu de la règle 49ter.1.g) aurait des effets tant sur la procédure que sur le fond. Par exemple, elle aurait des répercussions en ce qui concerne tant le calcul du délai pour l'ouverture de la phase nationale devant l'office désigné intéressé que l'évaluation de la nouveauté et de l'activité inventive pendant la recherche et l'examen réalisés au niveau national.
7. En adoptant la règle 49ter.2.a) modifiée (voir la page 5525), l'assemblée a pris note du fait qu'un office désigné pourrait, s'il le souhaite, appliquer les deux critères de restauration et laisser au déposant le choix du critère applicable dans un cas déterminé. En outre, un office désigné serait libre d'appliquer, à la demande du déposant, tout d'abord le critère de la "diligence requise" et, si l'office désigné constate qu'il n'a pas été satisfait à ce critère, le critère du "caractère non intentionnel".
8. En adoptant la règle 49ter.2.b)i) modifiée (voir la page 5527), l'assemblée a pris note du fait que, lorsque la demande internationale ne produit plus ses effets en vertu de l'article 11.3) parce que le déposant n'a pas accompli les actes mentionnés dans l'article 22 ou 39.1) dans le délai applicable, mais que l'office désigné rétablit les droits du déposant en ce qui concerne cette demande internationale conformément à la règle 49.6 ou 76.5.ii), respectivement, ce rétablissement s'étendra à tous les délais calculés à partir du délai applicable en vertu de l'article 22 ou 39.1), respectivement, y compris le délai prévu à la règle 49ter.2.b)i).

(THIRTY-FOURTH (15TH ORDINARY) SESSION) (cont'd)****AMENDMENTS OF THE REGULATIONS UNDER THE PCT: UNDERSTANDINGS RELATING TO CERTAIN PROVISIONS
(cont'd)**

9. In connection with the adoption of amended Rule 49*ter*.2(h) (see page 5526), the Assembly noted that any designated Office whose national law provides for a criterion more stringent than the “due care” criterion or does not provide for restoration of the right of priority at all may make use of the reservation provision in Rule 49*ter*.2(h). Designated Offices whose applicable national law provides for the restoration of the right of priority based on requirements similar but not identical to the requirements under Rule 49*ter*.2(a) and (b) will not need to make use of the reservation provision if the requirements under the applicable national law are, from the viewpoint of applicants, at least as favorable as the requirements under Rule 49*ter*.2(a) and (b).

10. In connection with the adoption of amended Rule 91.3(f) (see page 5540), the Assembly noted that, where a designated Office has given a notification of incompatibility under Rule 20.8(b) in respect of the application of provisions relating to the incorporation by reference of missing elements or parts, that Office will not be obliged, in determining for the purposes of Rule 91.3(f) whether it would have authorized the rectification, to take into account the contents of any description, claims or drawings incorporated by reference under Rule 20.6.

9. En adoptant la règle 49*ter*.2.h) modifiée (voir la page 5527), l'assemblée a pris note du fait que tout office désigné dont la législation nationale prévoit un critère plus restrictif que celui de la "diligence requise" ou ne prévoit pas la restauration du droit de priorité pourra faire usage de la disposition de réserve prévue à la règle 49*ter*.2.h). Les offices désignés dont la législation nationale applicable prévoit la restauration du droit de priorité dans des conditions comparables mais non identiques aux conditions prévues à la règle 49*ter*.2.a) et b) n'auront pas besoin de faire usage de la disposition de réserve, sous réserve que les conditions énoncées dans la législation nationale applicable soient, du point de vue des déposants, au moins aussi favorables que les conditions énoncées à la règle 49*ter*.2.a) et b).

10. En adoptant la règle 91.3.f) modifiée (voir la page 5541), l'assemblée a pris note du fait que, lorsqu'un office désigné a formulé une réserve en vertu de la règle 20.8.b) en ce qui concerne l'application de dispositions relatives à l'incorporation par renvoi d'éléments manquants ou de parties manquantes, cet office ne sera pas tenu, lorsqu'il décide en vertu de la règle 91.3.f) s'il aurait autorisé ou non la rectification, de prendre en considération le contenu de toute description, revendication ou dessin incorporé par renvoi selon la règle 20.6.
